THE
INGREDIENTS
OF THE UNIVERSE

Let's start from easy pieces

Human Body	
Oxygen	65%
Carbon	18%
Hydrogen	10%
Nitrogen	3%
Calcium	1.5%
Phosphorus	1.2%
Potassium	0.2%

Earth	
Iron	35%
Oxygen	28%
Magnesium	17%
Silicon	13%
Nickel	3%
Sulfur	3%
Alluminum	0.4%

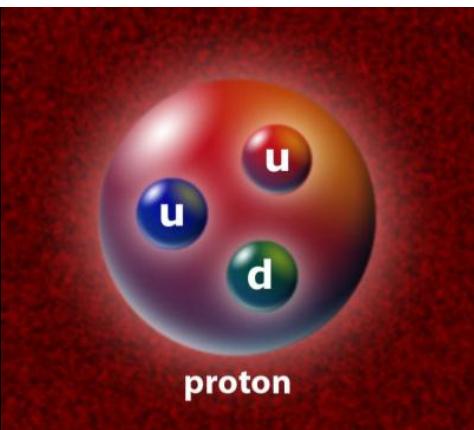

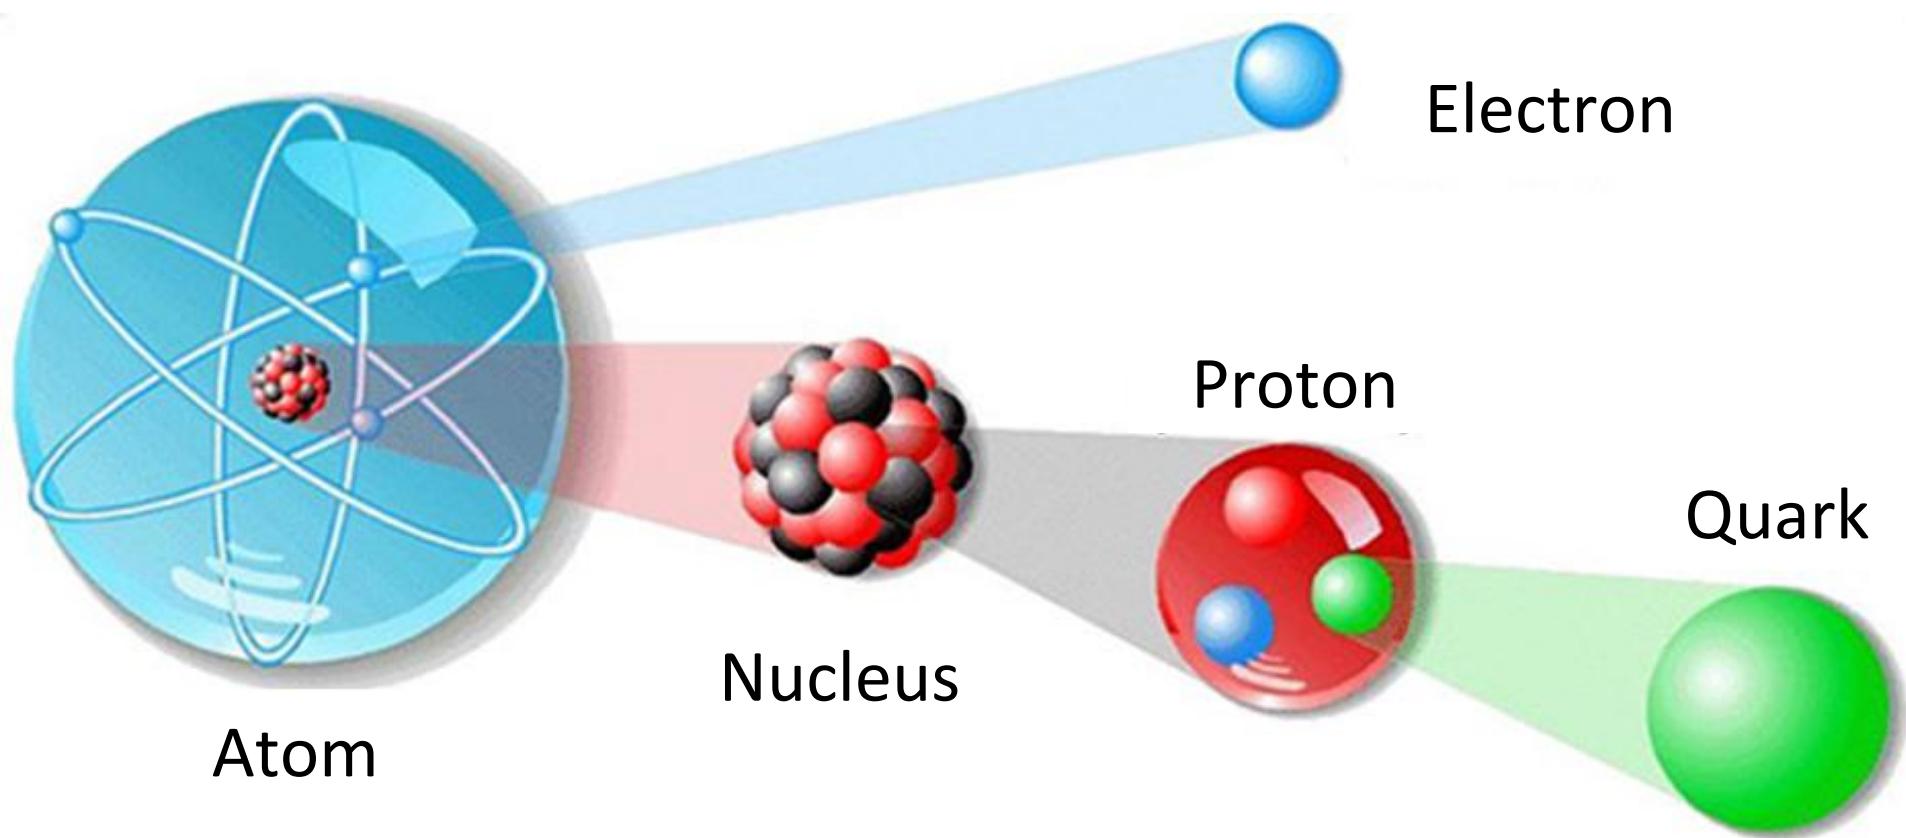

Milky Way	
Hydrogen	74%
Helium	24%
Others	2%

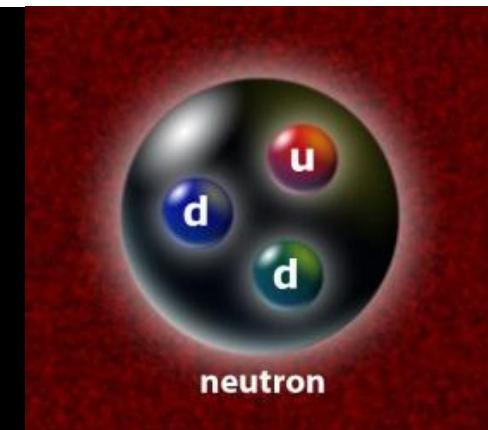

Periodic Table of the Elements

Periodic Table of the Elements																																																						
1	H	Hydrogen 1.00794	2	He	Helium 4.002603	METALS

The Structure of the Atom

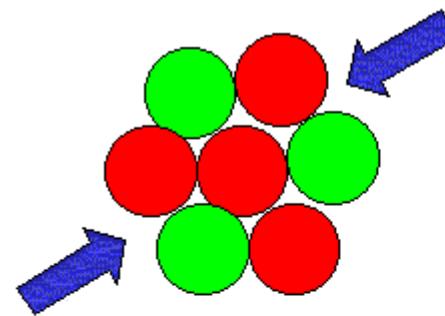

All the Matter we are made of
is composed by just
3 Elementary Particles:
Quark Up
Quark Down
Elettron

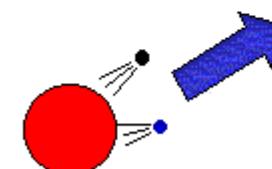

Elementary Particles and Fundamental Forces

Electromagnetic Force
(keeps atoms together)

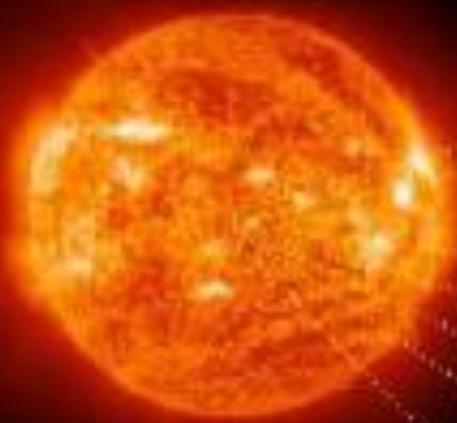

Strong Force
(keeps nuclei together)

Weak Force
(breaks nuclei apart)

Neutrinos from Cosmos

Neutrinos from Sun
70 billions /cm² s

Big Bang Neutrinos
3000 billions /cm² s

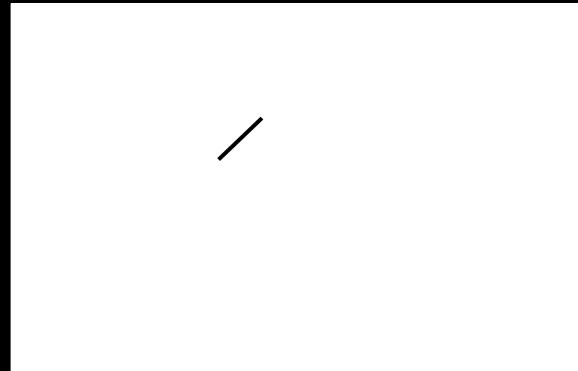

A neutrino crossing the Earth
has a 0.000001% probability
to hit something

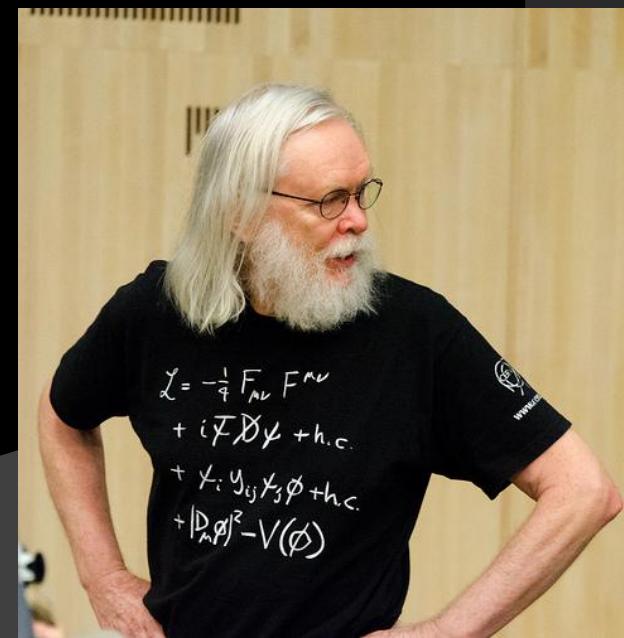

Elementary Particles and Fundamental Forces

Standard Model Lagrangian

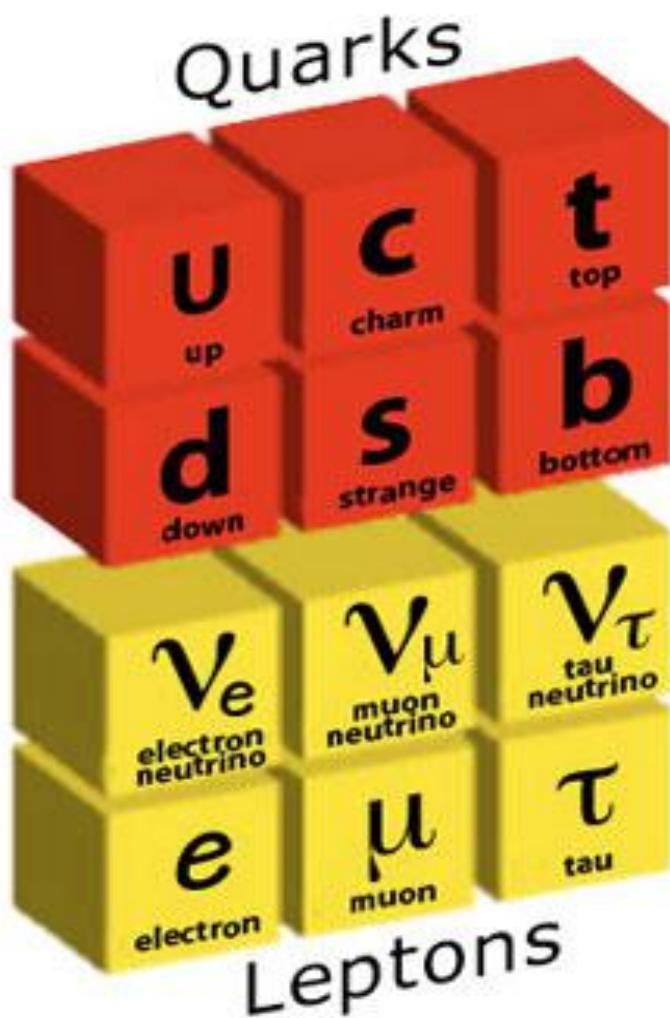

It's the function describing
all the microscopic world
Physics
Chemistry
Biology

Particles

Antiparticles

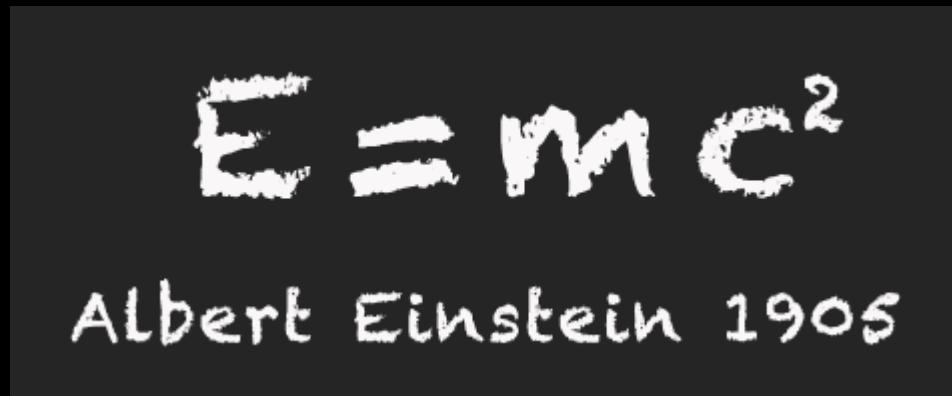

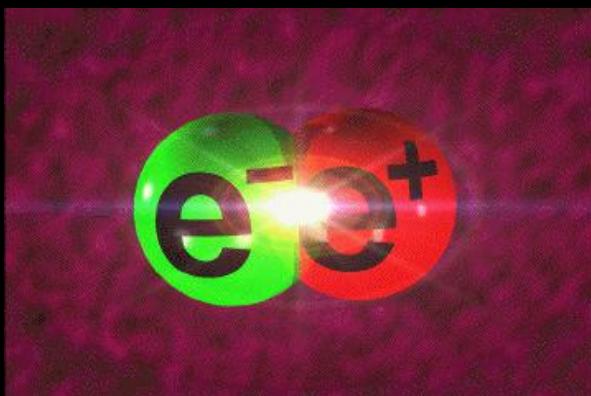

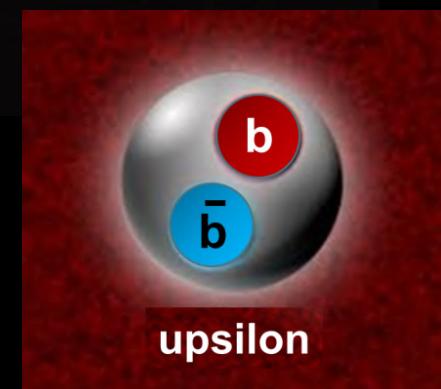

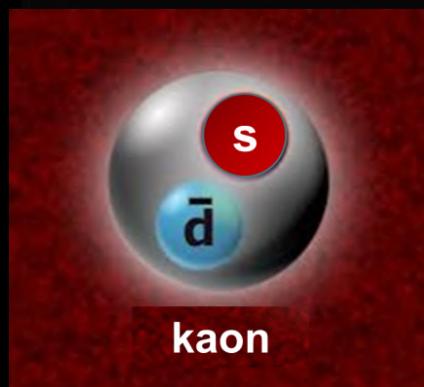

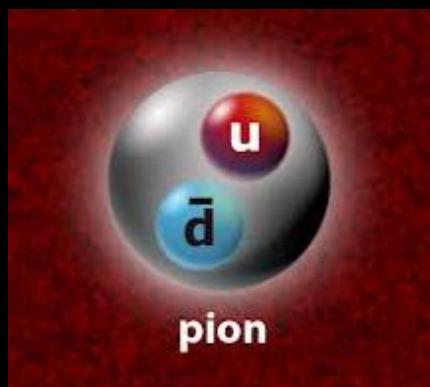

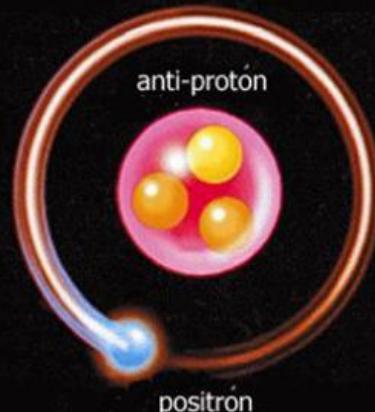

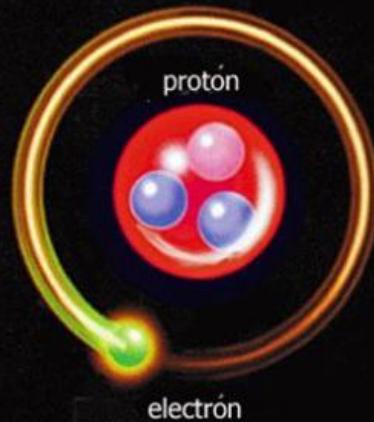

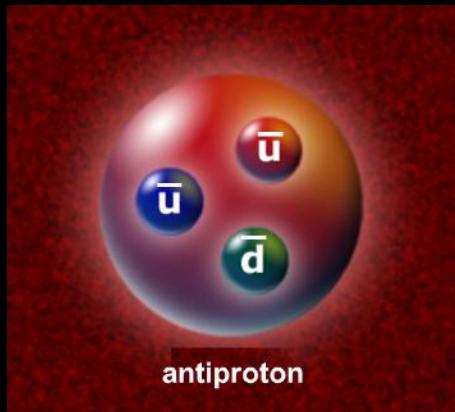

Where is the Antimatter?

Potassium-40 is a natural isotope ingested when drinking mineral water and eating bananas

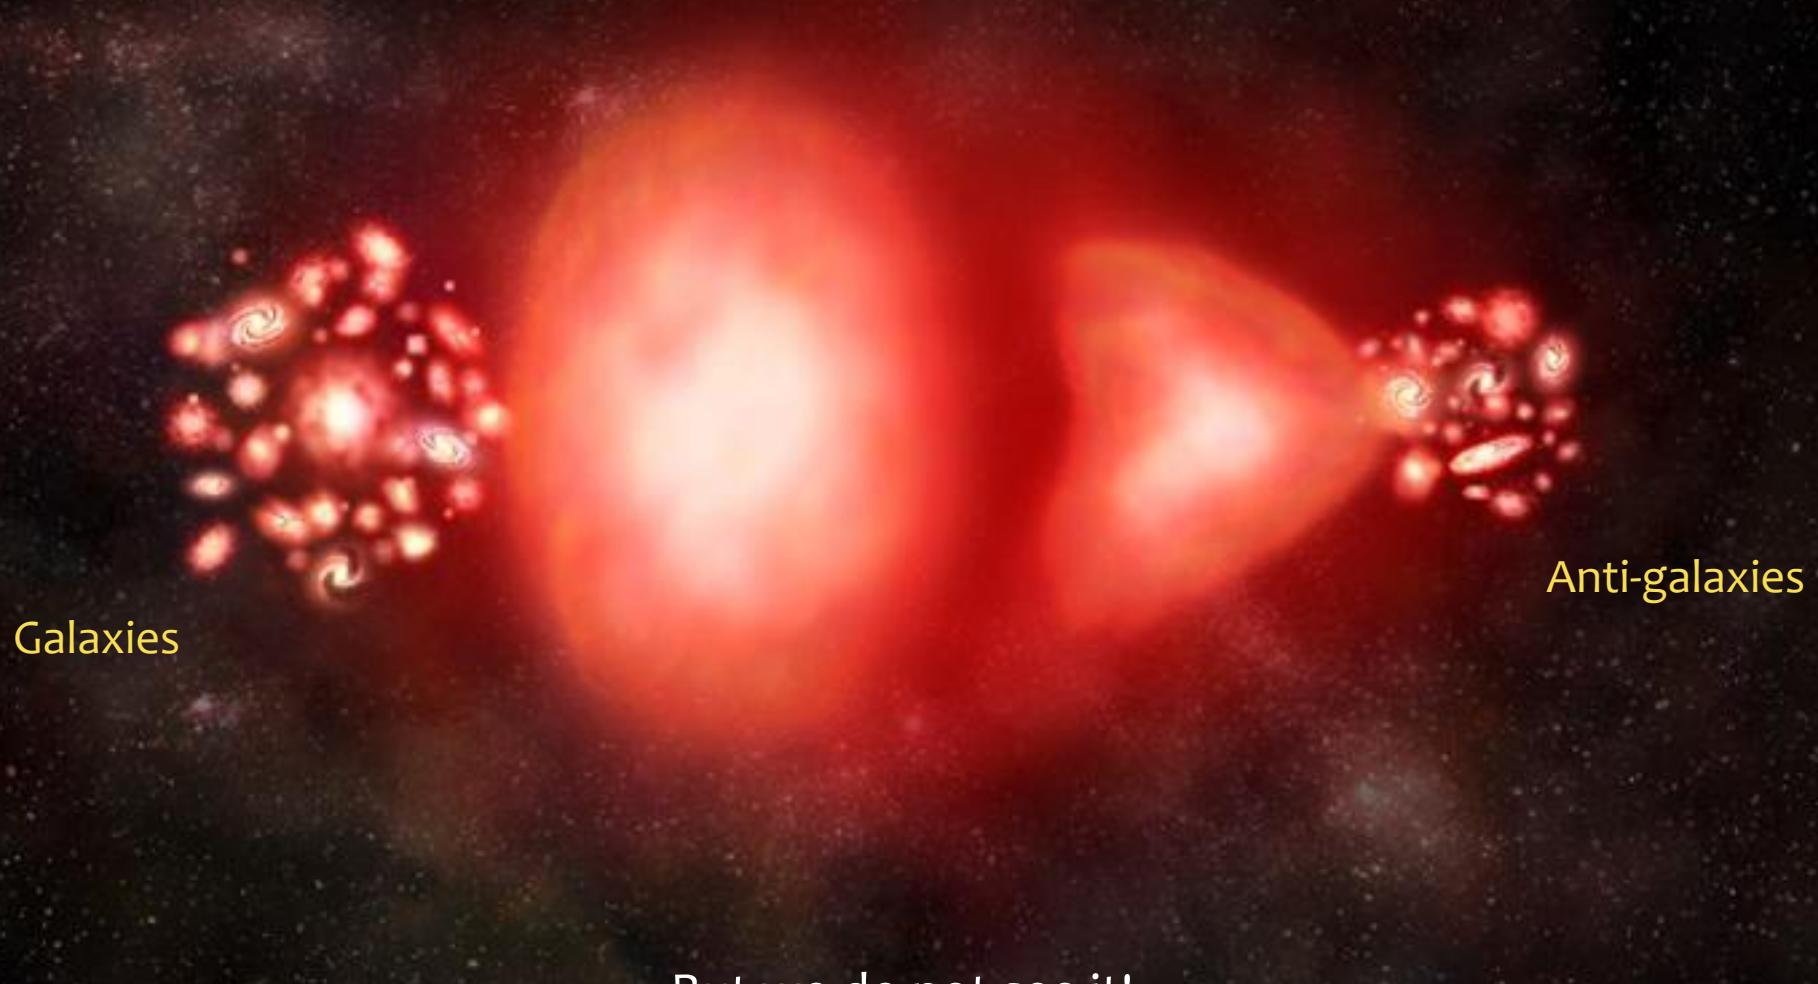

A 80 kg weight person emits 180 positrons per hour!

Antimatter

And in the Universe?

Should antimatter-made galaxies exist we would see huge amount of radiation coming from the clash of Matter and Antimatter

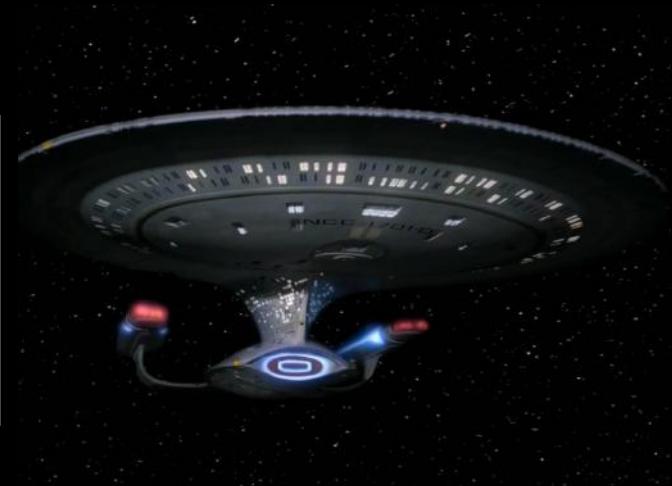

But we do not see it!

**Antimatter is not an ingredient of the Universe
Universe is only made of Matter**

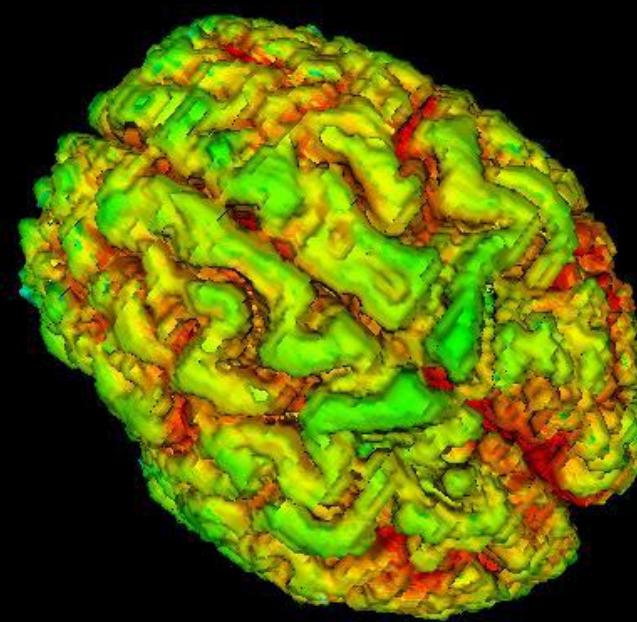

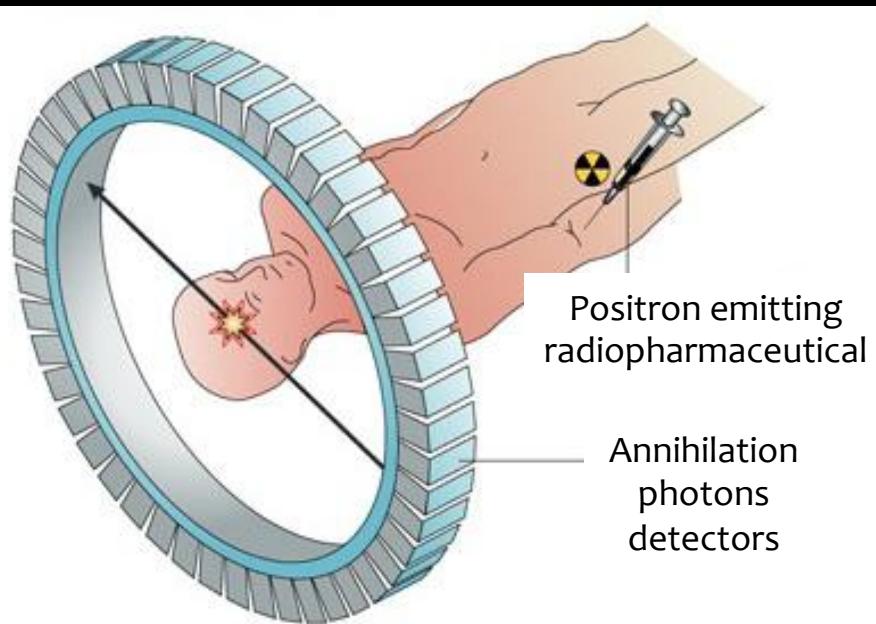

Antimatter is a serious thing

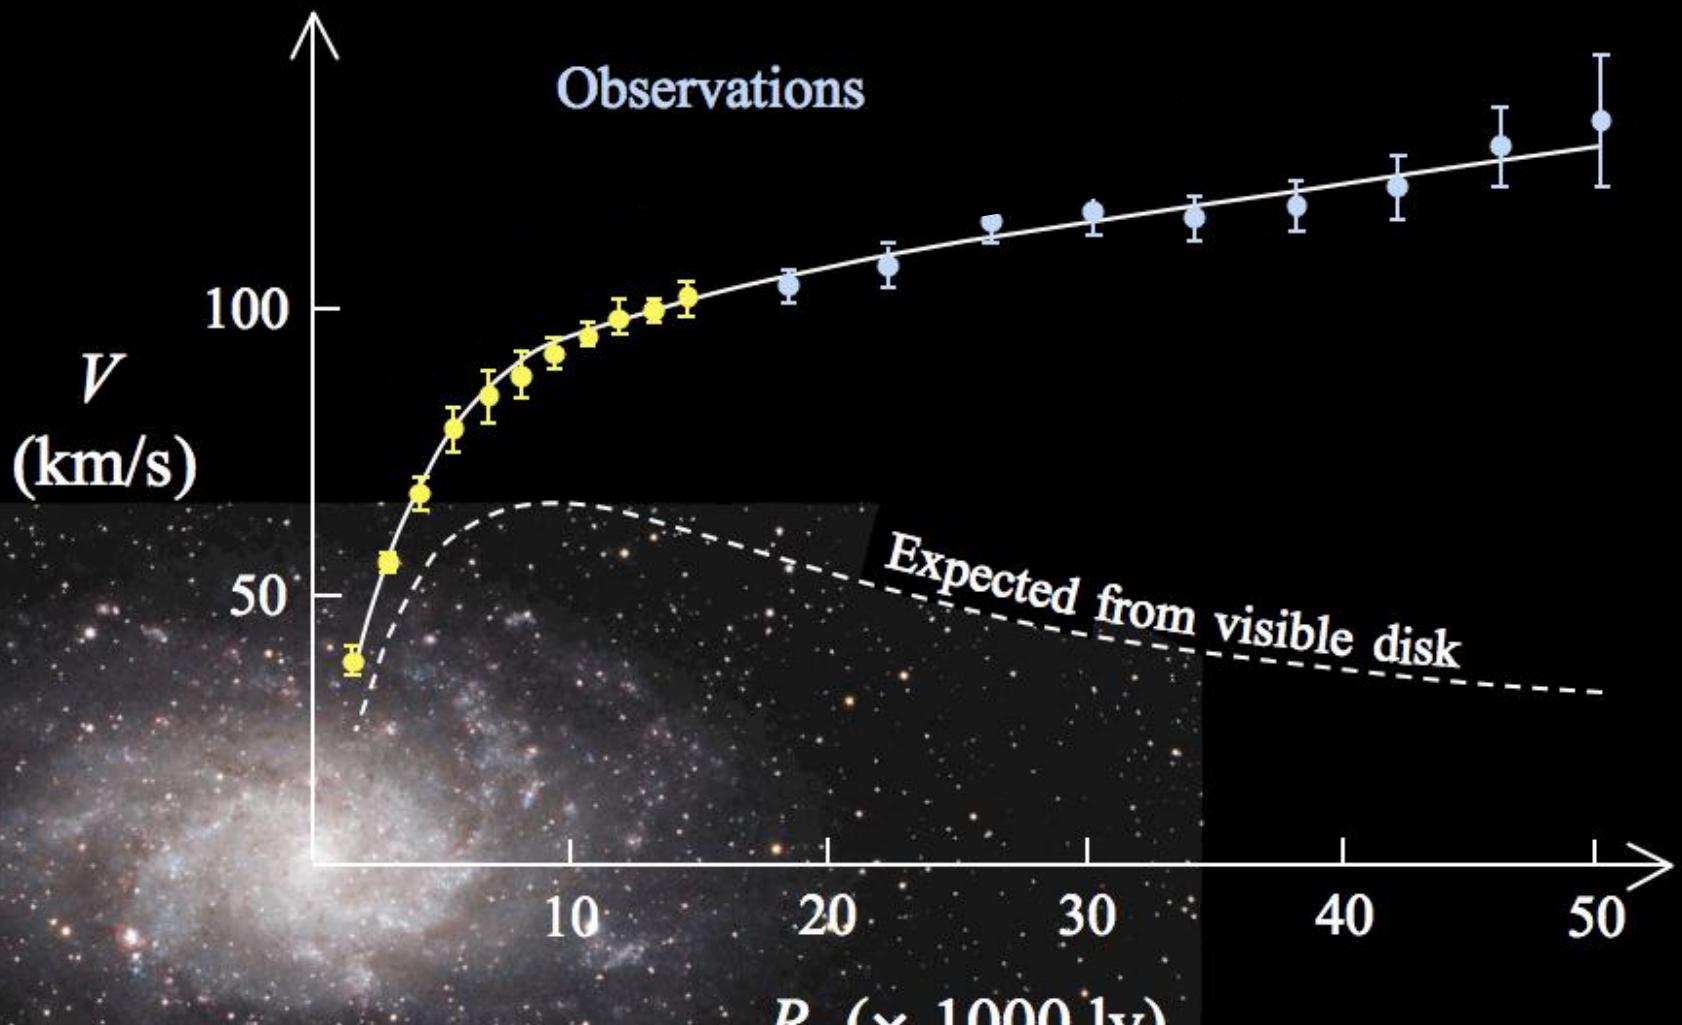

Energy required to produce antimatter is much higher than energy produced by its annihilation

PET (Positron Emission Tomography) Cancer Diagnosis

Amazingly outermost stars orbit faster

**Galaxies are immersed in cloud of matter acting gravitationally
but not emitting any kind of radiation**

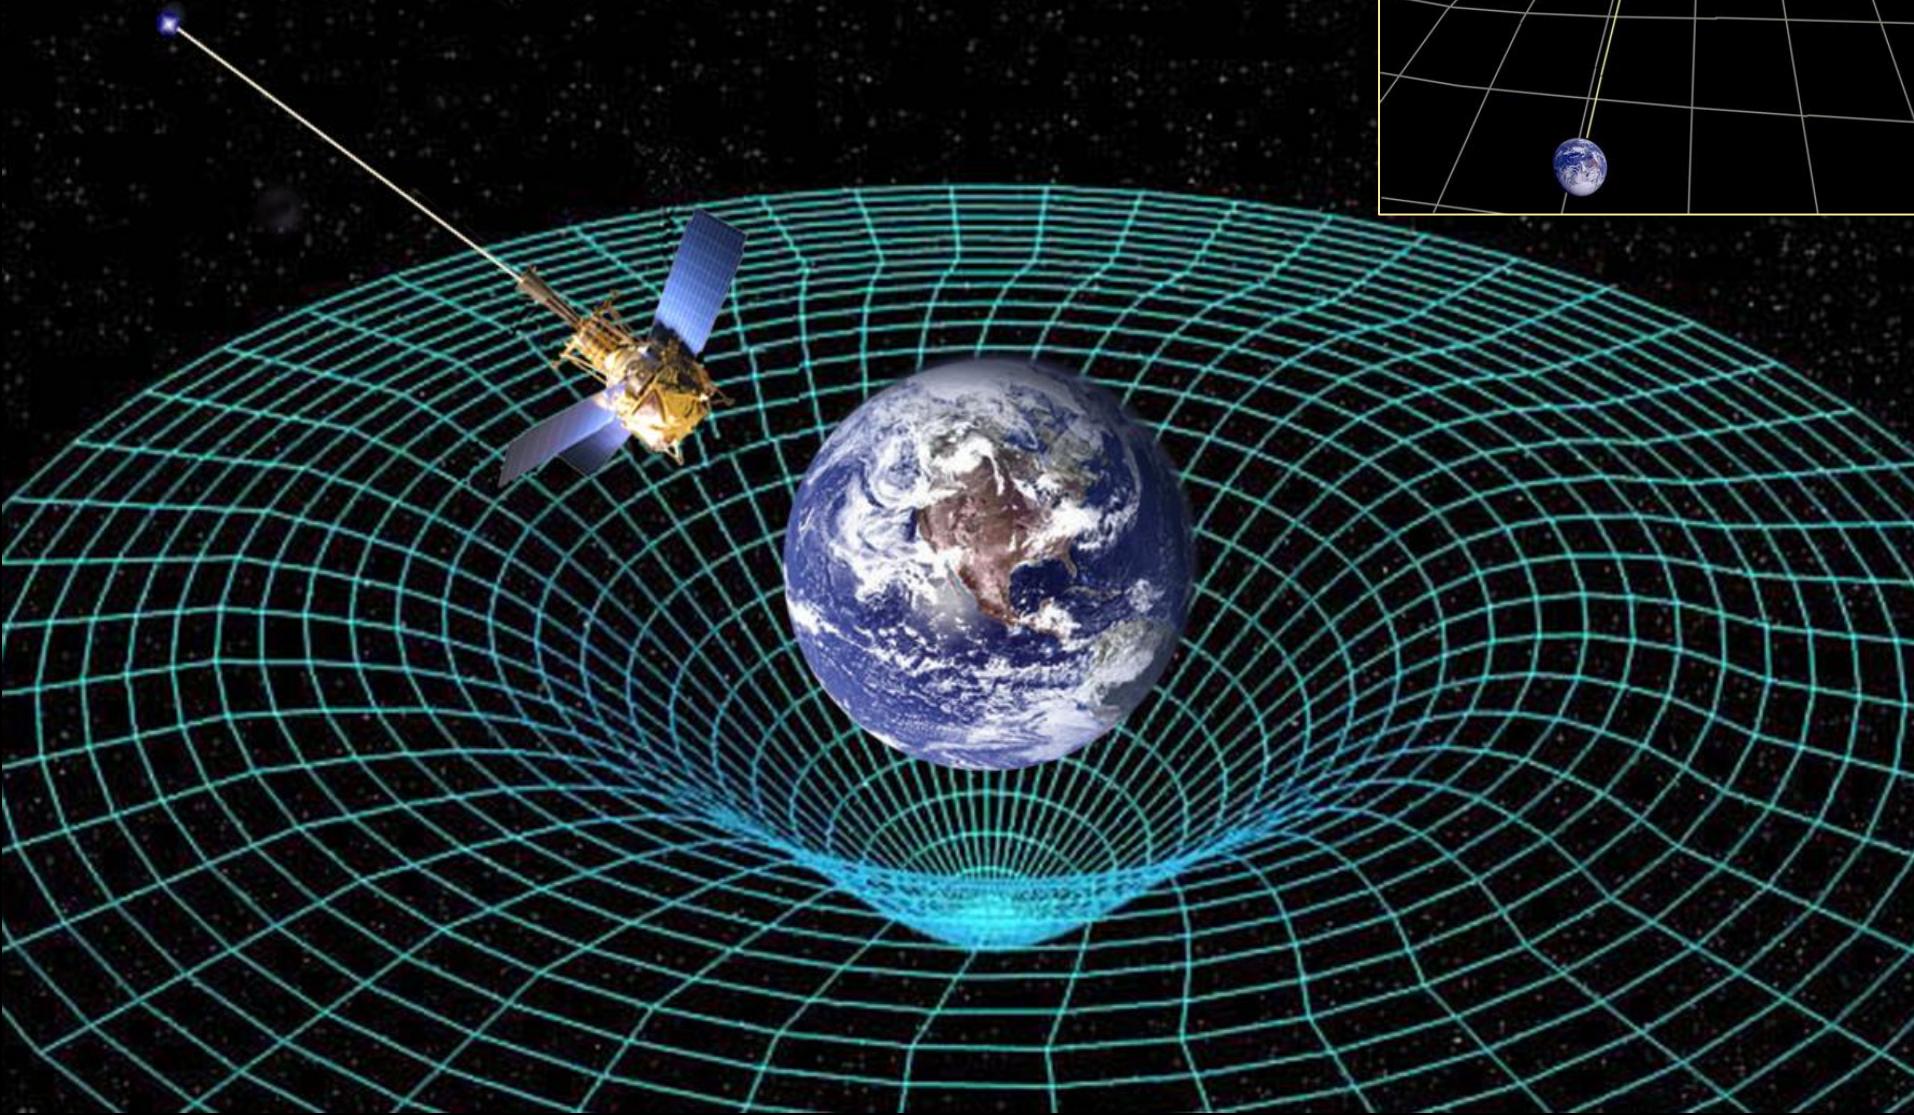

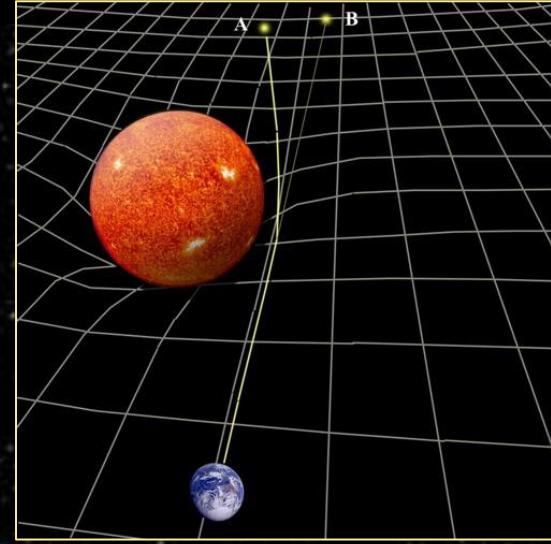

A photograph of a spiral galaxy, likely the Milky Way, viewed from an angle. The central bulge is bright yellow and orange, transitioning into a blue and white spiral arm structure. The background is a deep, textured blue, with small white dots representing distant stars.

Galaxy

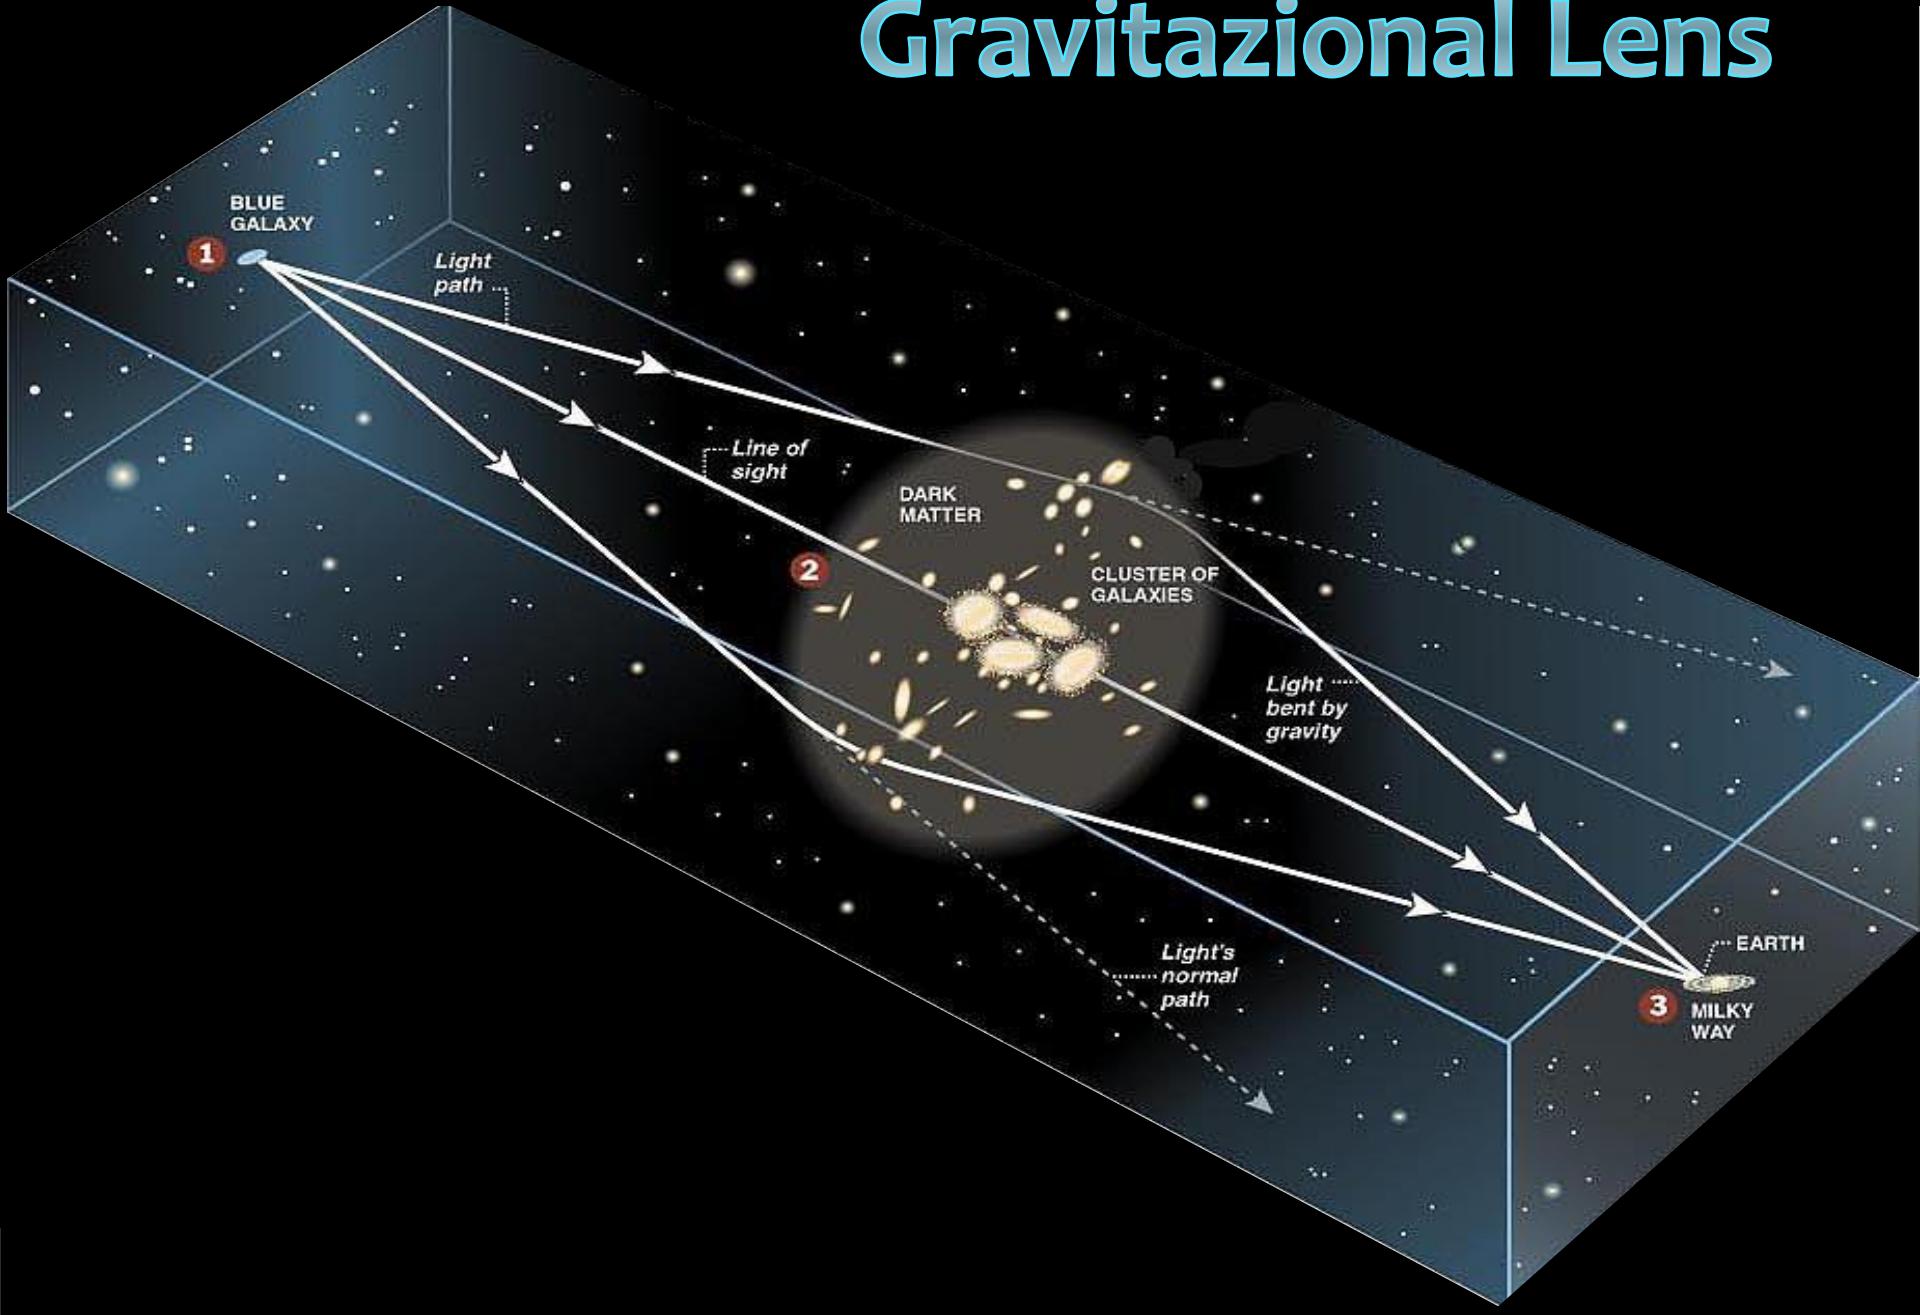

Dark Matter

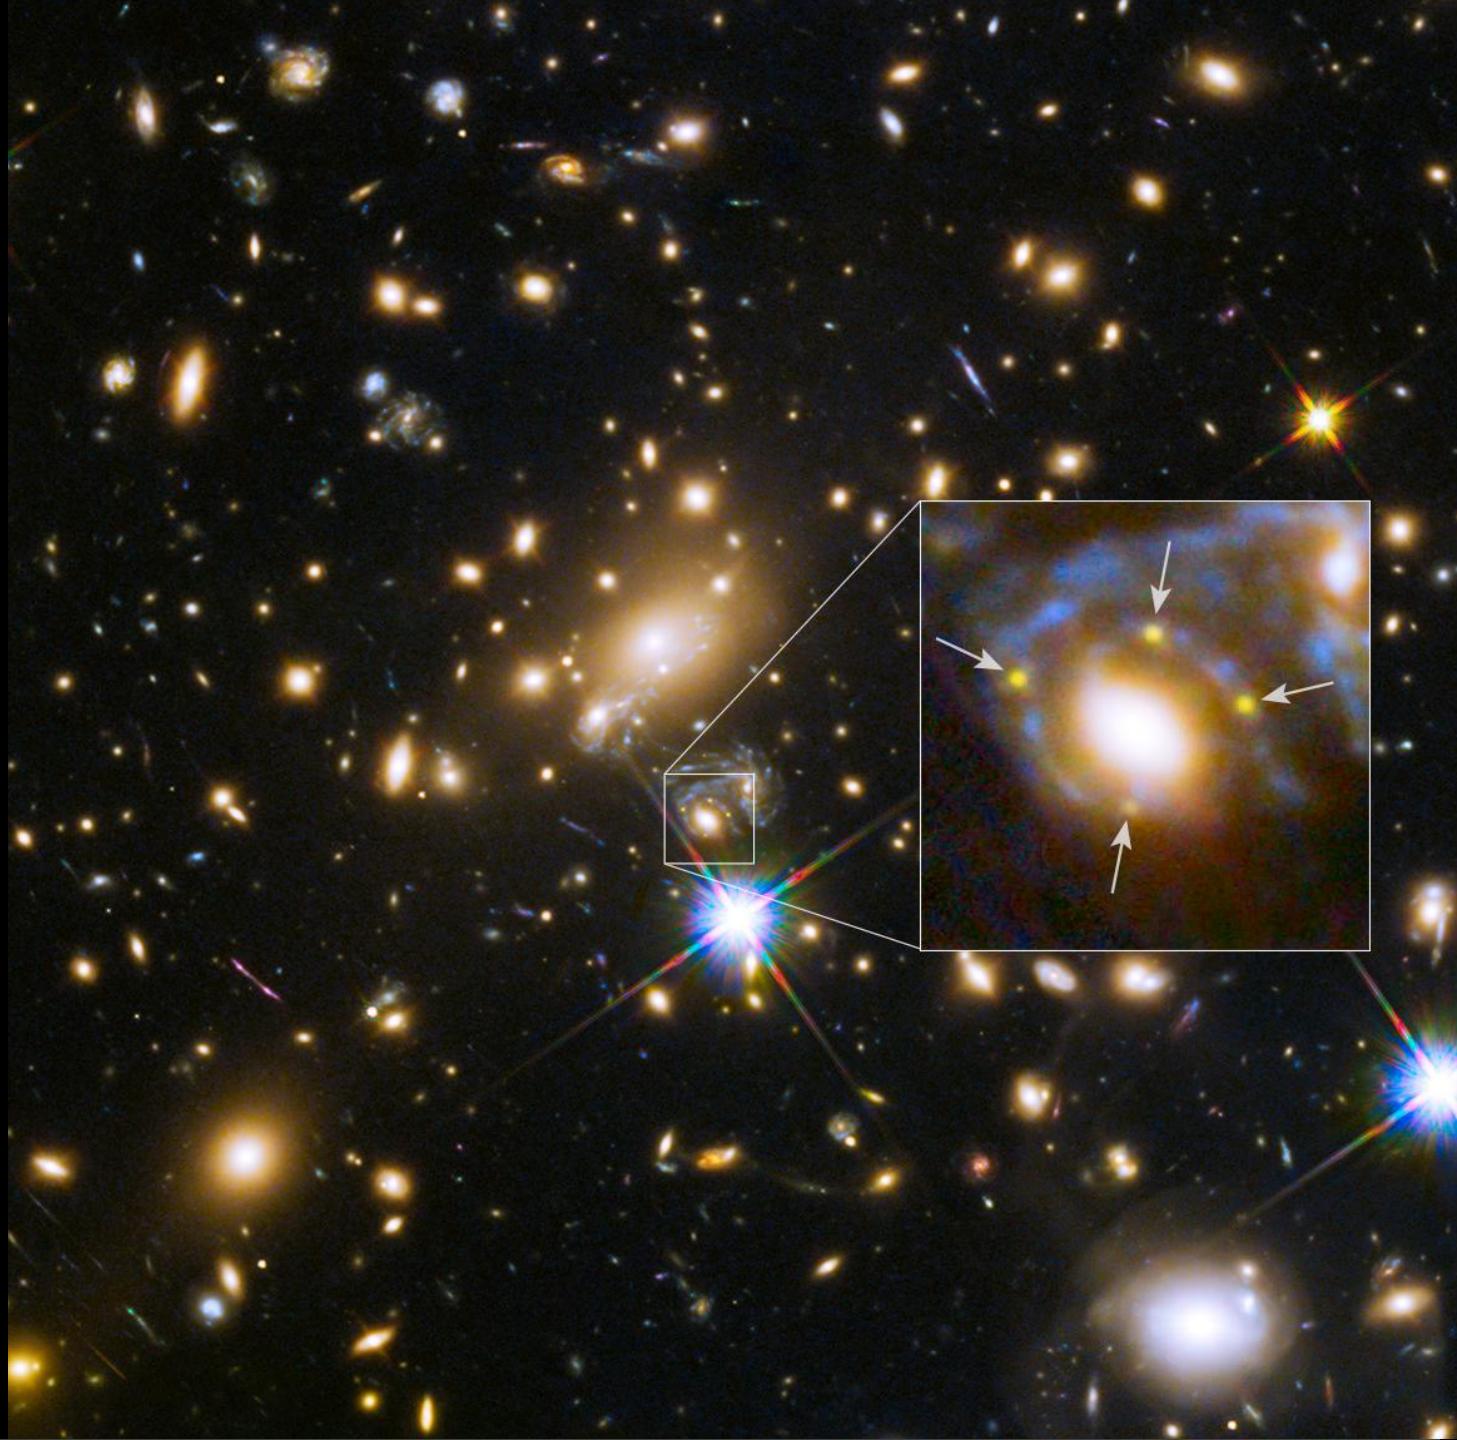

General Theory of Relativity describes Gravity as a geometrical effect of the curvature of the space created by the presence of matter.

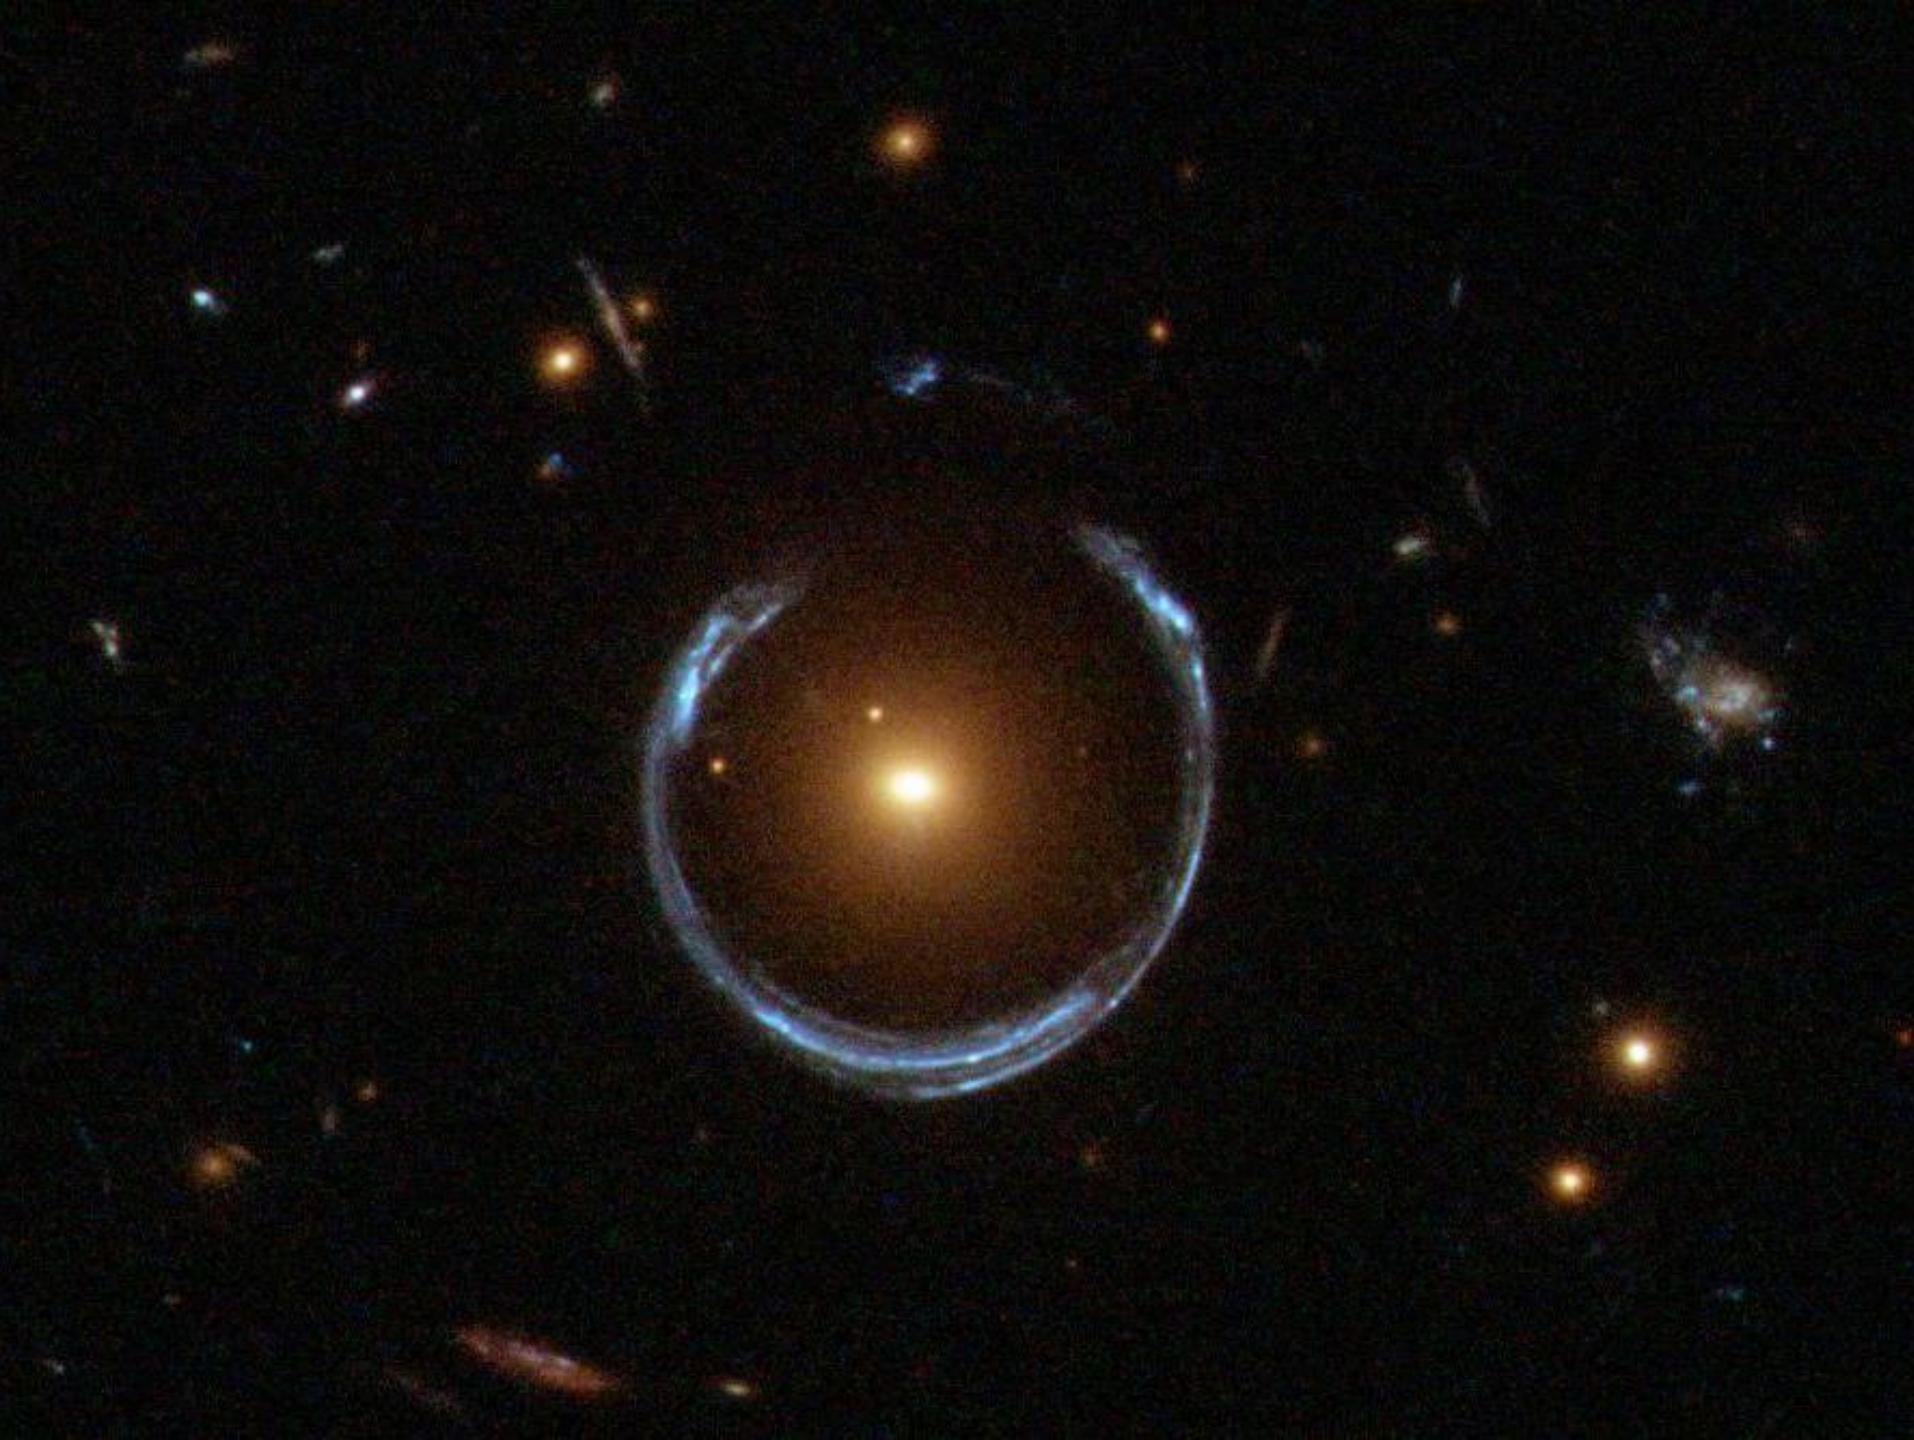

Light is bent by matter as well!

Gravitational Lens

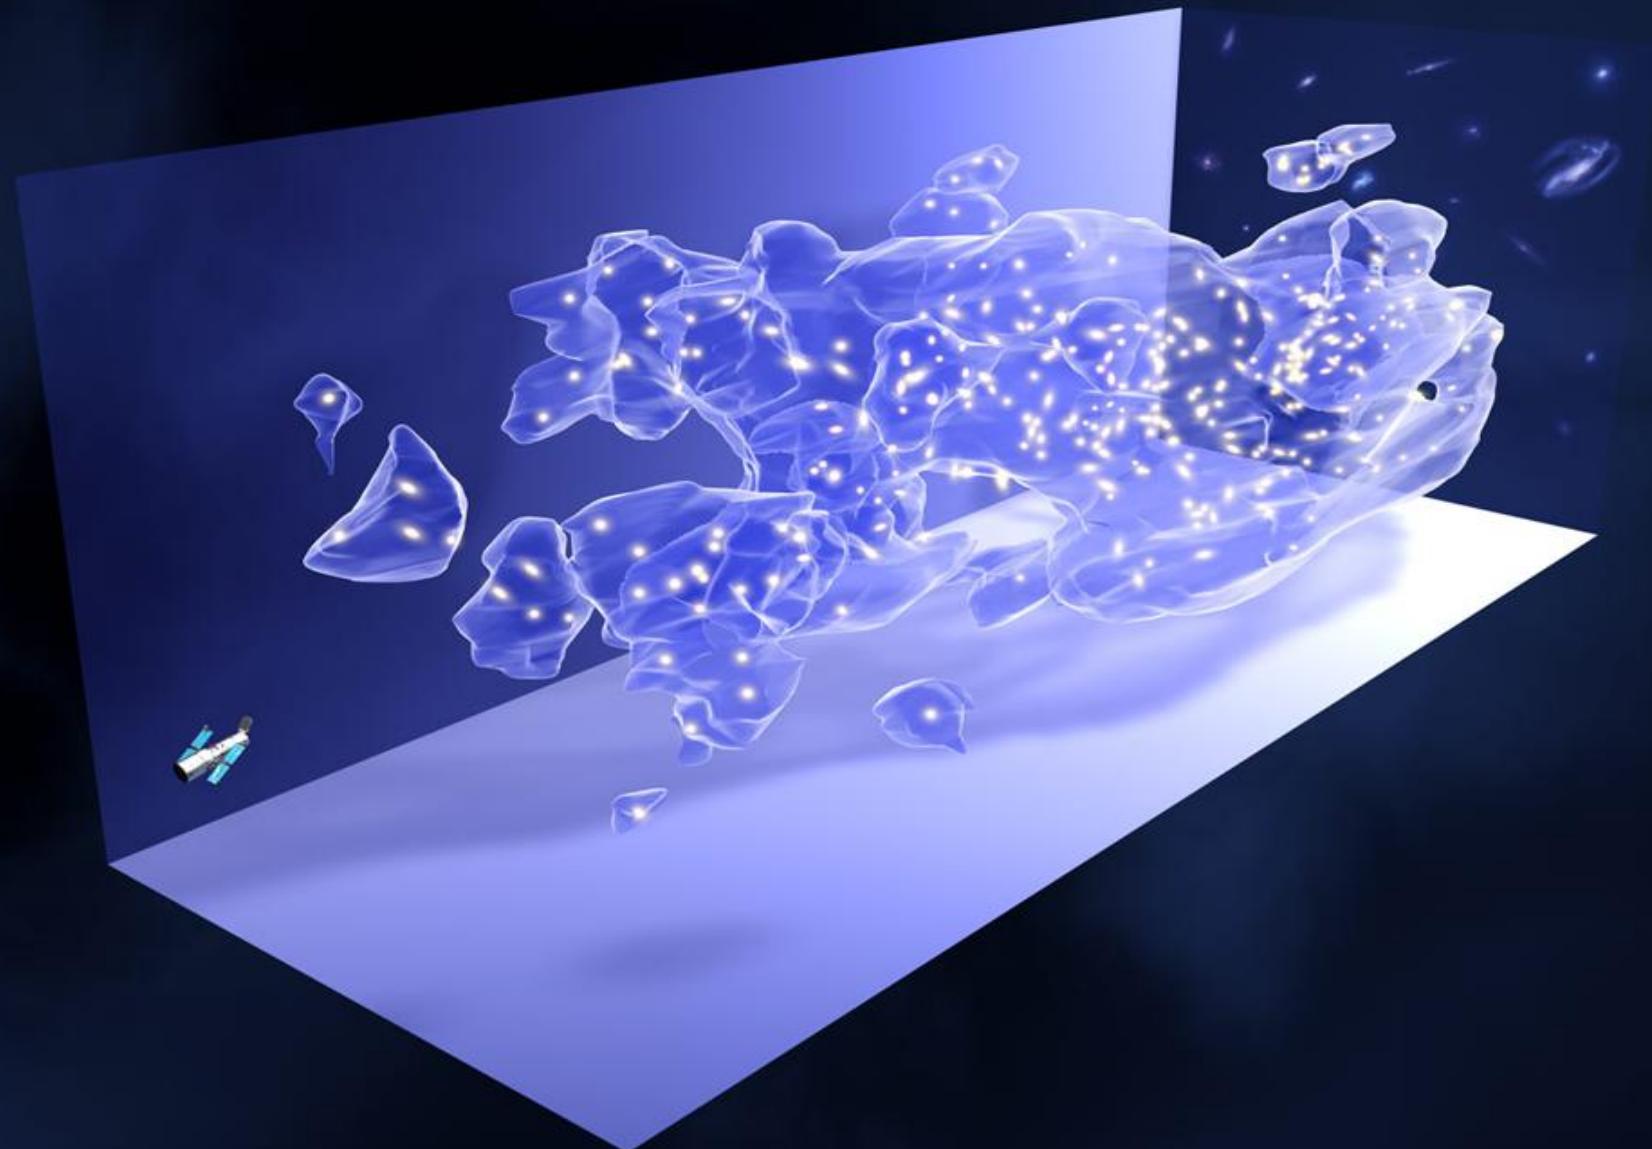

The whole Universe is immersed in a
Dark Matter cloud!

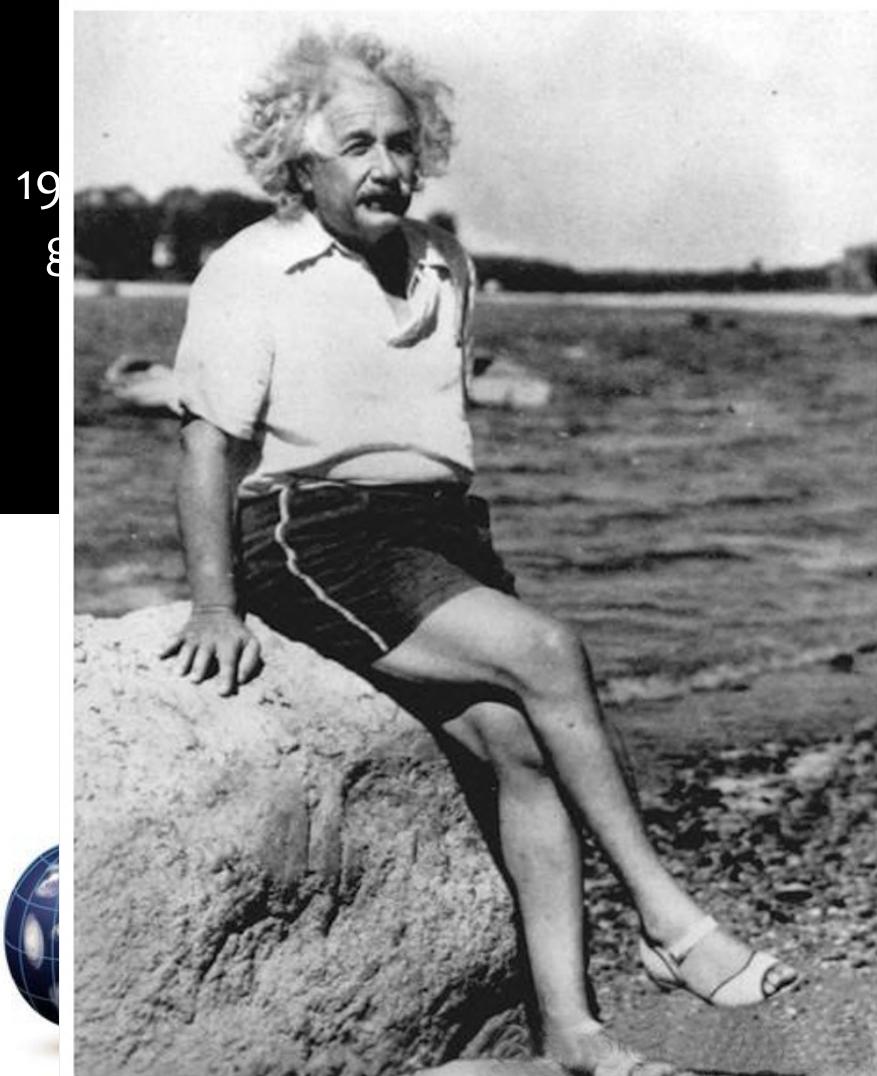

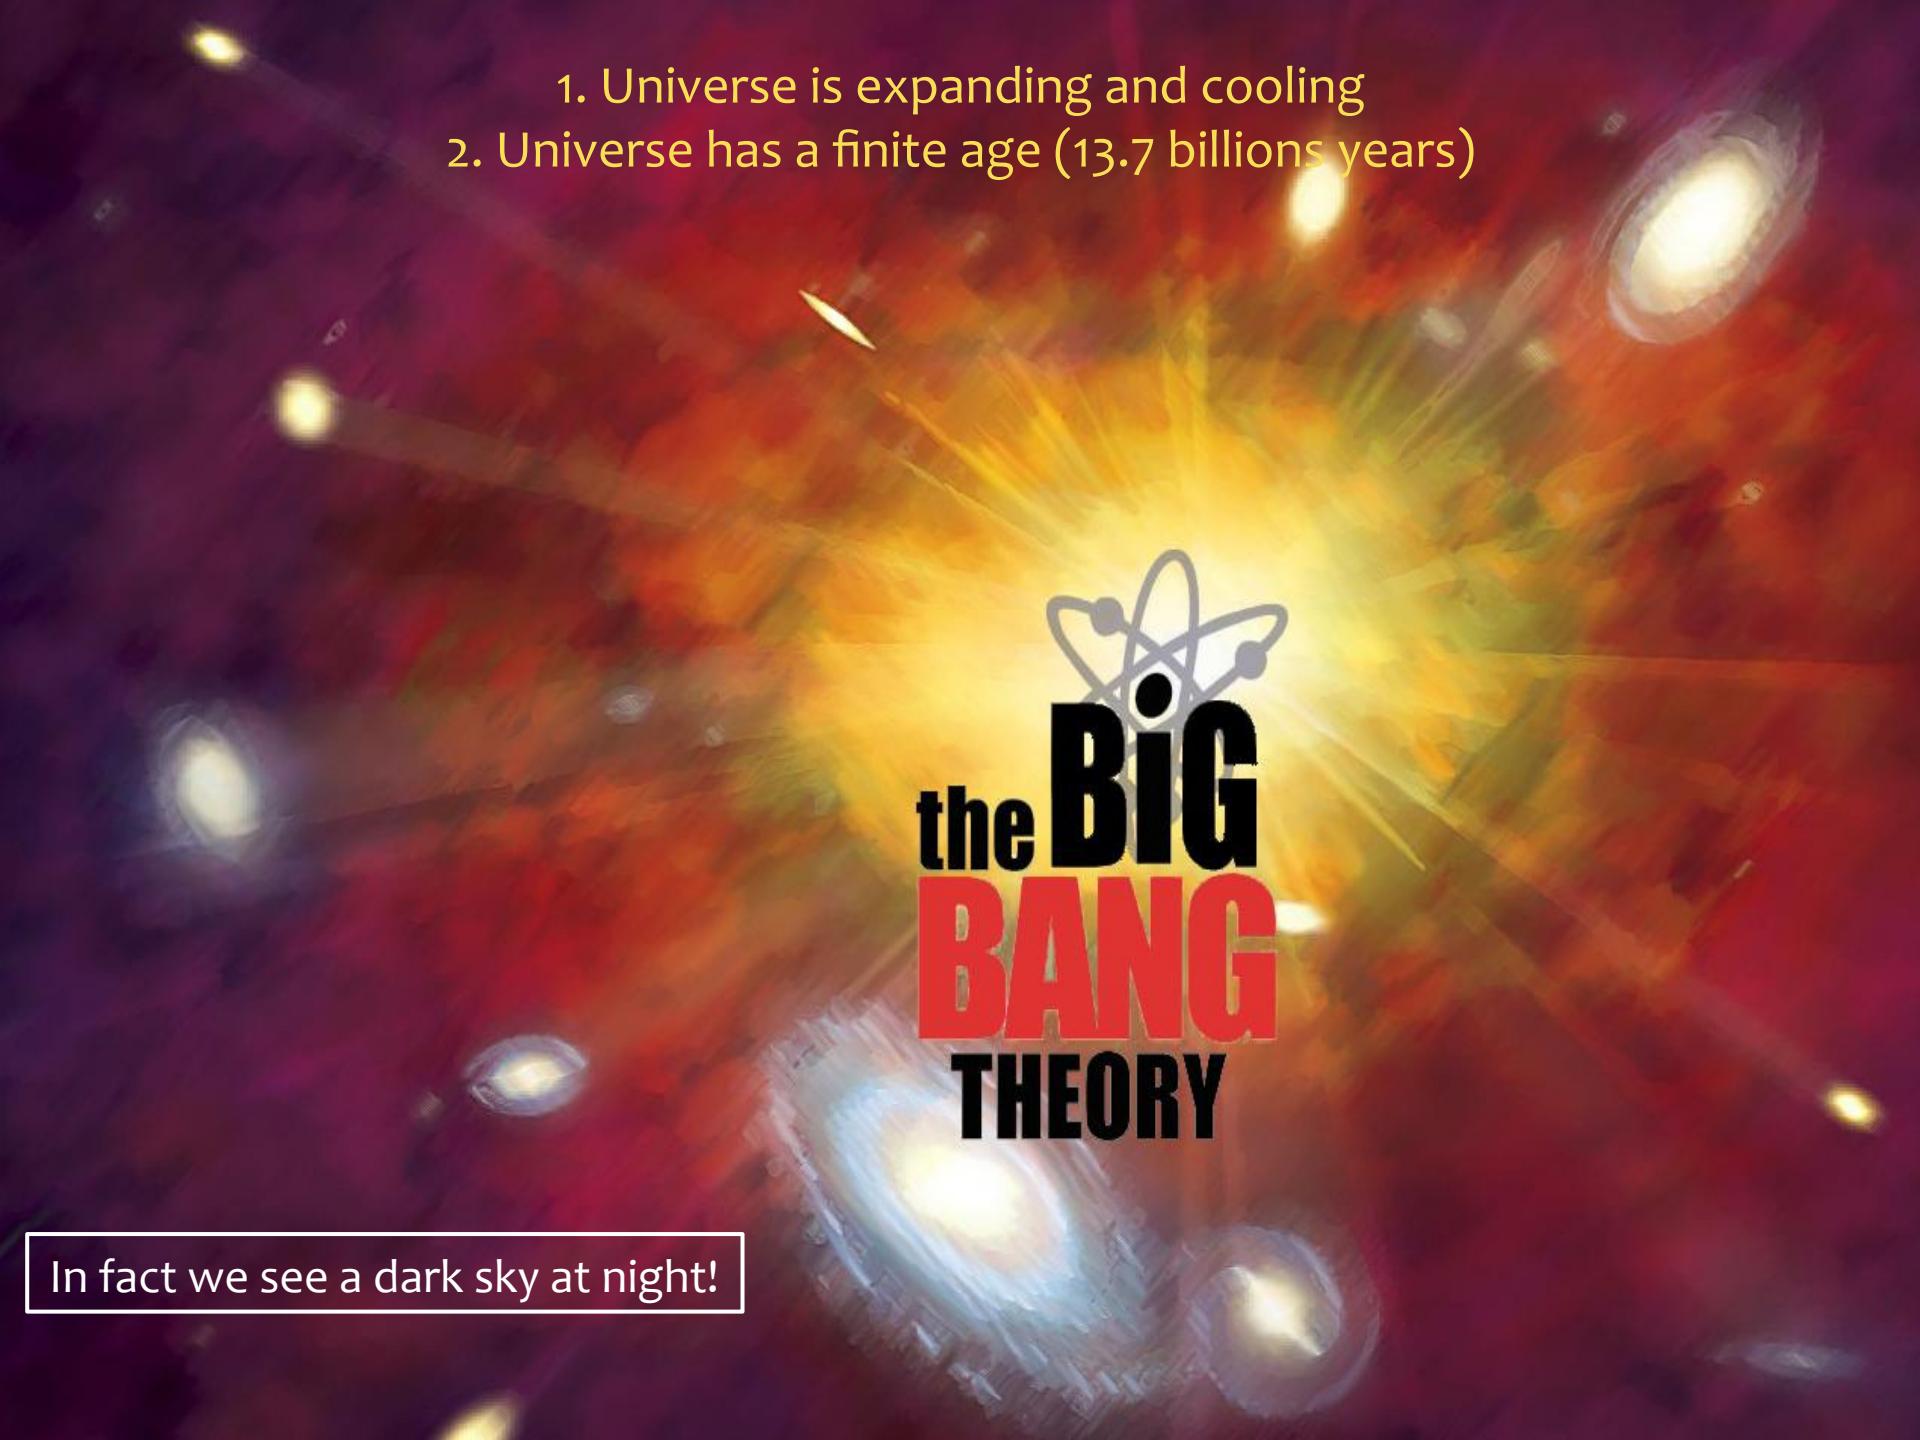

1916 - Einstein believed in a static Universe: he added the Cosmological Constant (Λ) to his Field Equation to obtain stability

$$\frac{8\pi G}{c^4} T_{\mu\nu} = R_{\mu\nu} - \frac{1}{2}R g_{\mu\nu} + \lambda g_{\mu\nu}$$

Einstein will say: «that was my biggest blunder»

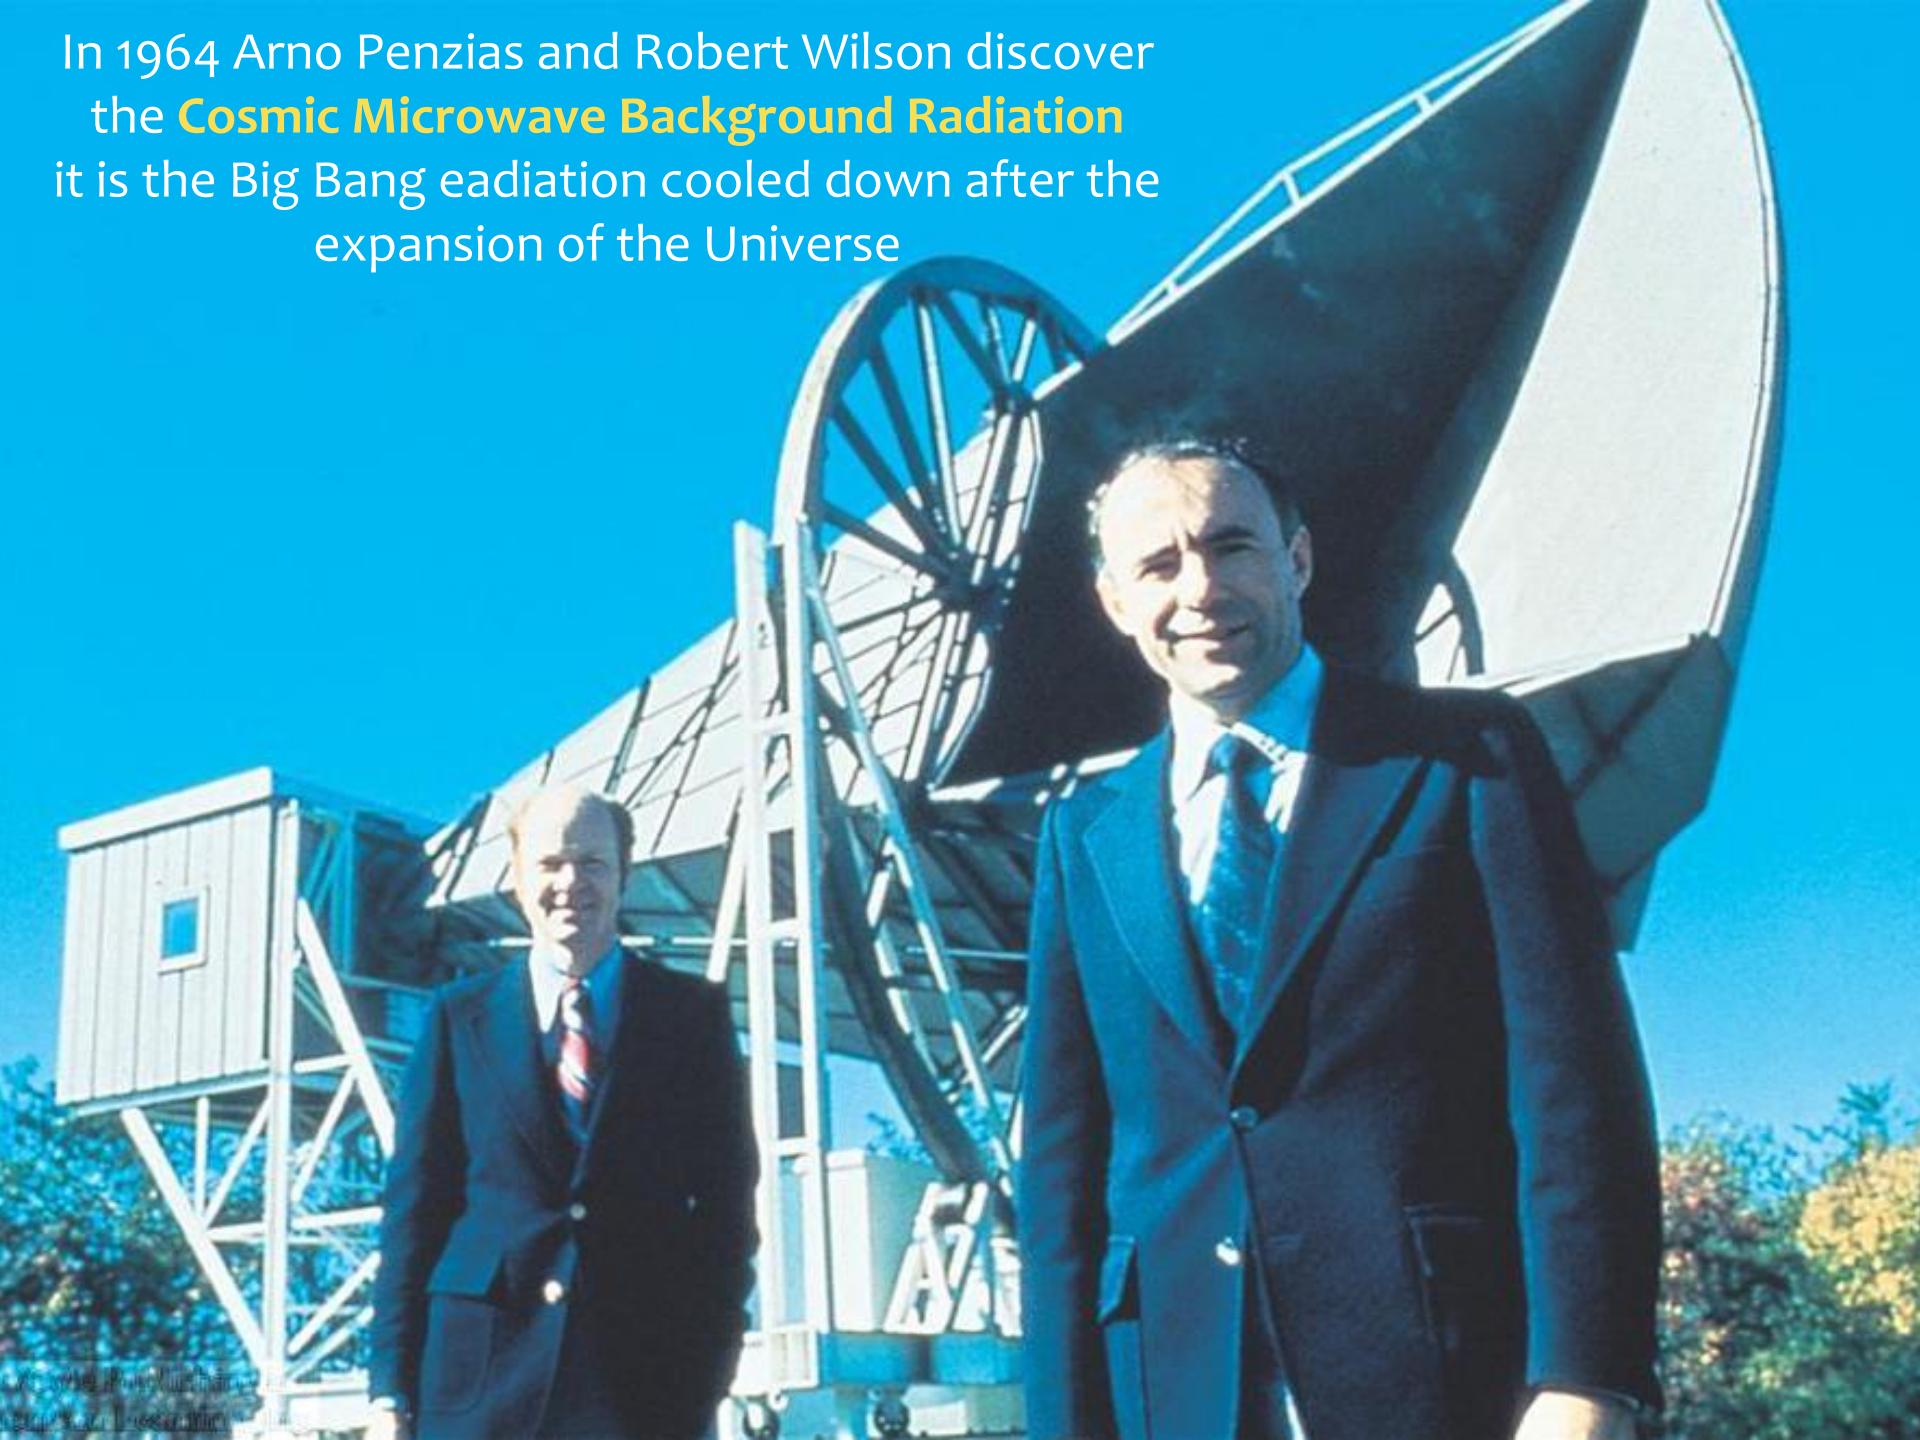

- 
1. Universe is expanding and cooling
 2. Universe has a finite age (13.7 billions years)

the **BiG** **BANG** THEORY

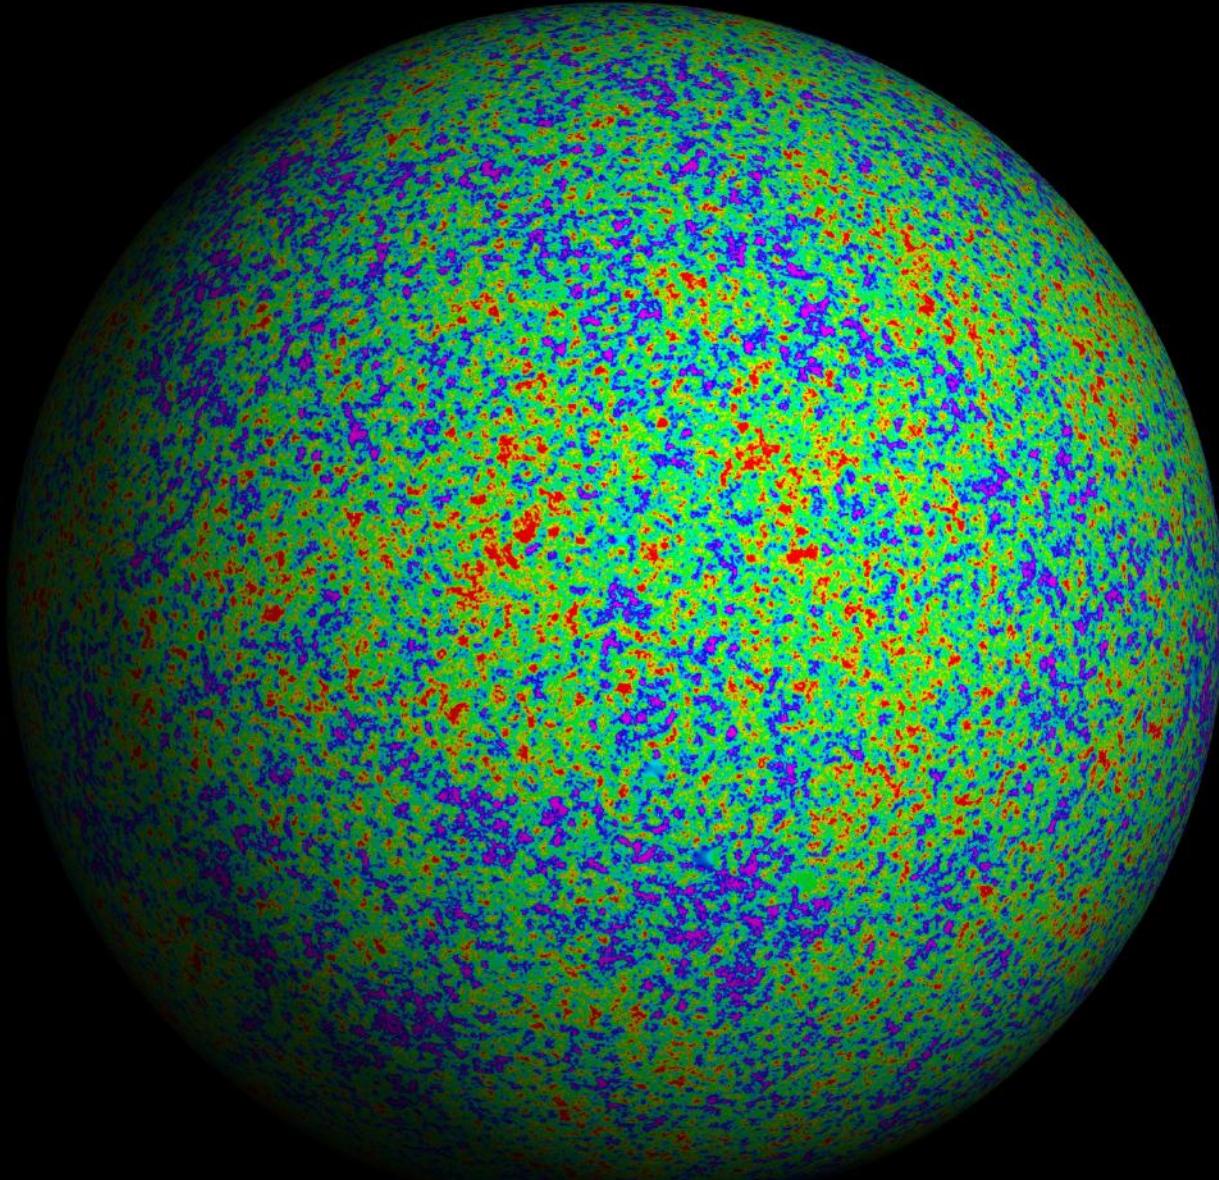

In fact we see a dark sky at night!

In 1964 Arno Penzias and Robert Wilson discover
the **Cosmic Microwave Background Radiation**
it is the Big Bang radiation cooled down after the
expansion of the Universe

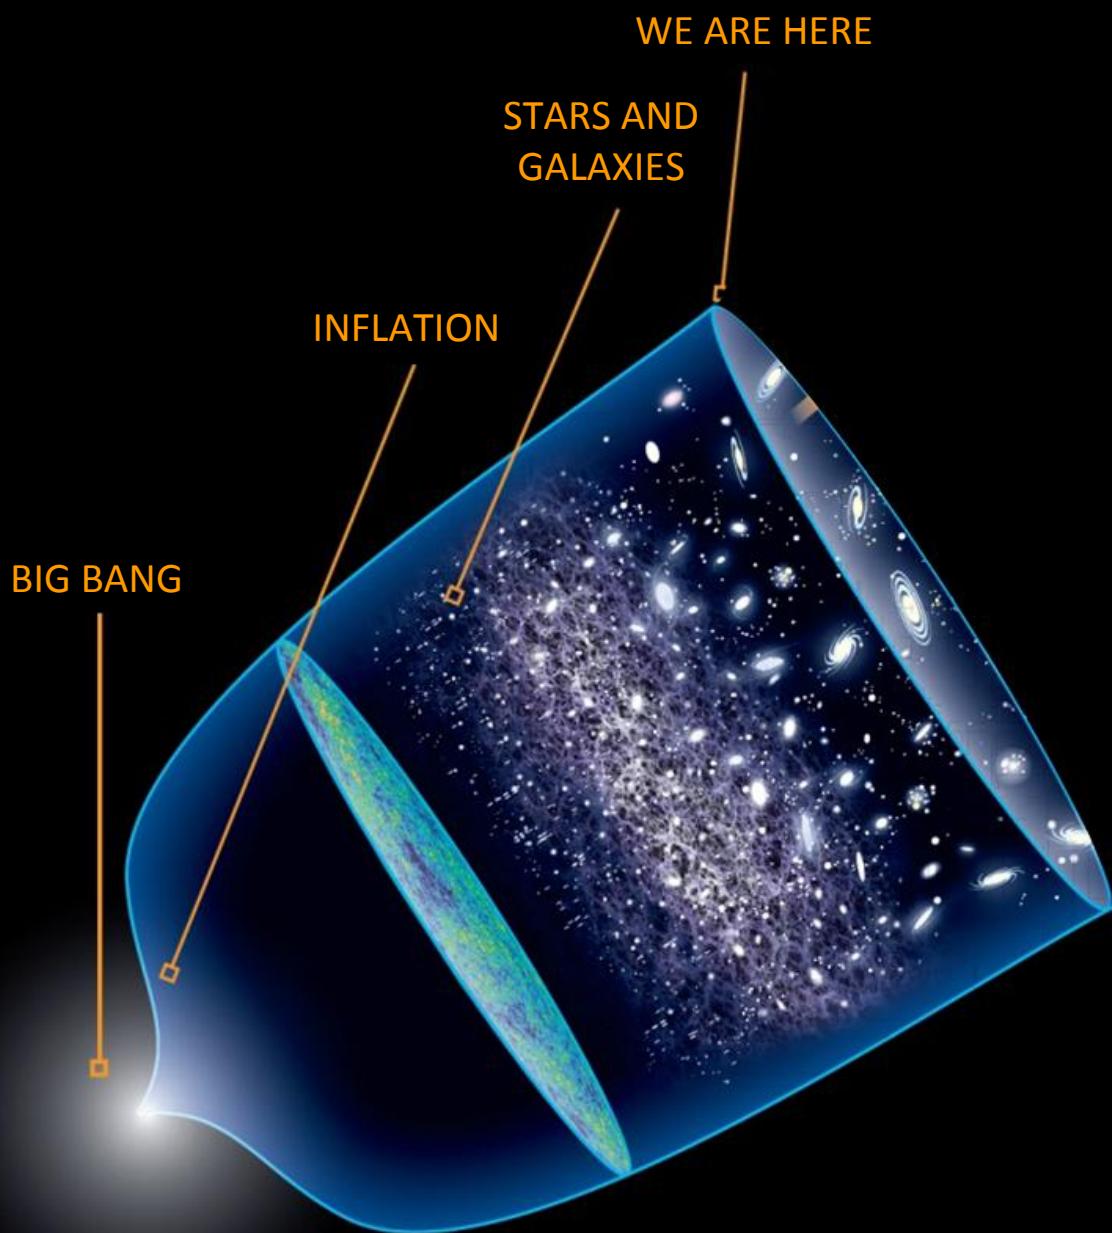

the experimental proof of the Big Bang Theory

a picture of the Universe when it was «only» 380,000 year-old
like having a picture of a 80 year-old man when he was 1 day-old

The Expanding Universe

Big Bang
(beginning of space and time)

10^{-30} s
Cosmic Inflation
(very fast expansion)

380000 years
Microwave Background
Radiation

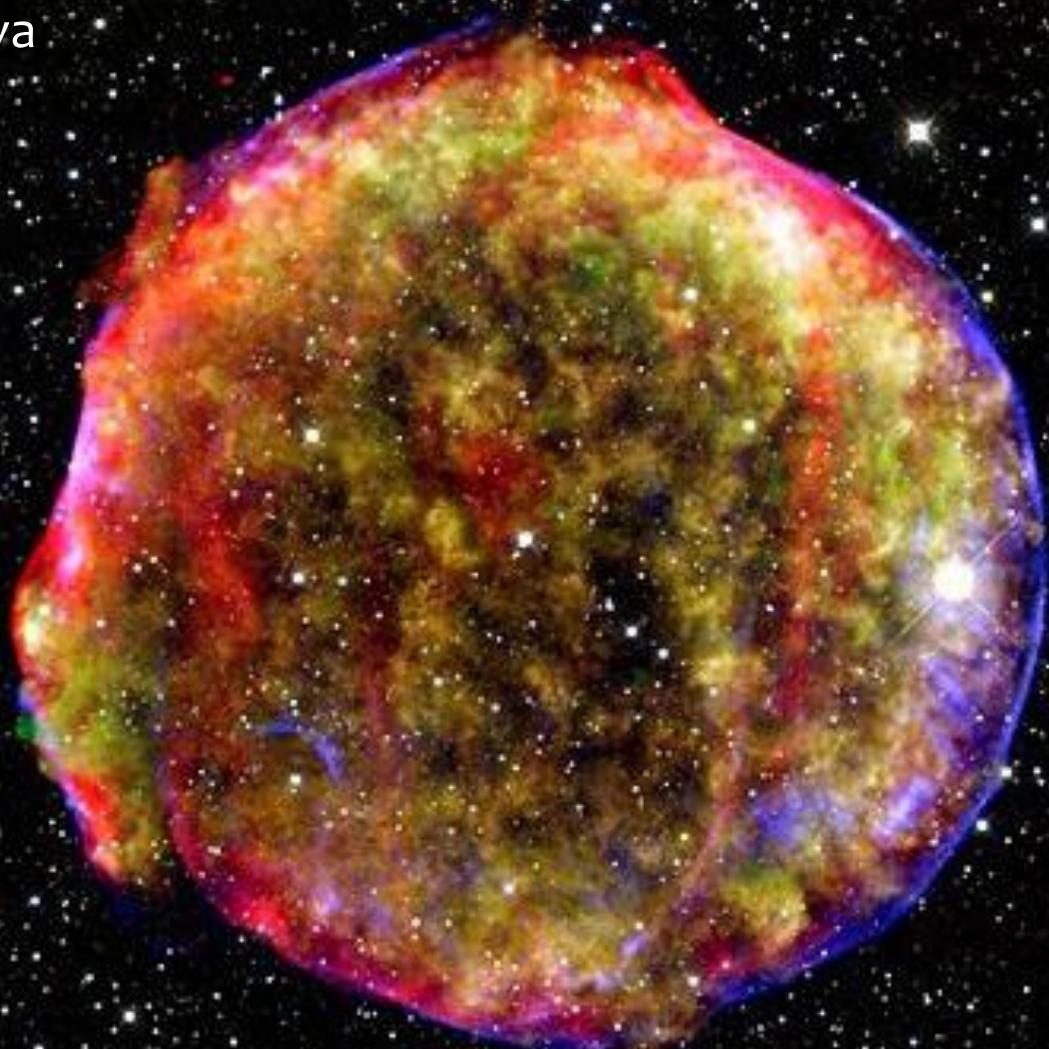

400 million years
Formation of first stars
Expansion slow down

13.7 billions years
Now

Type Ia Supernova

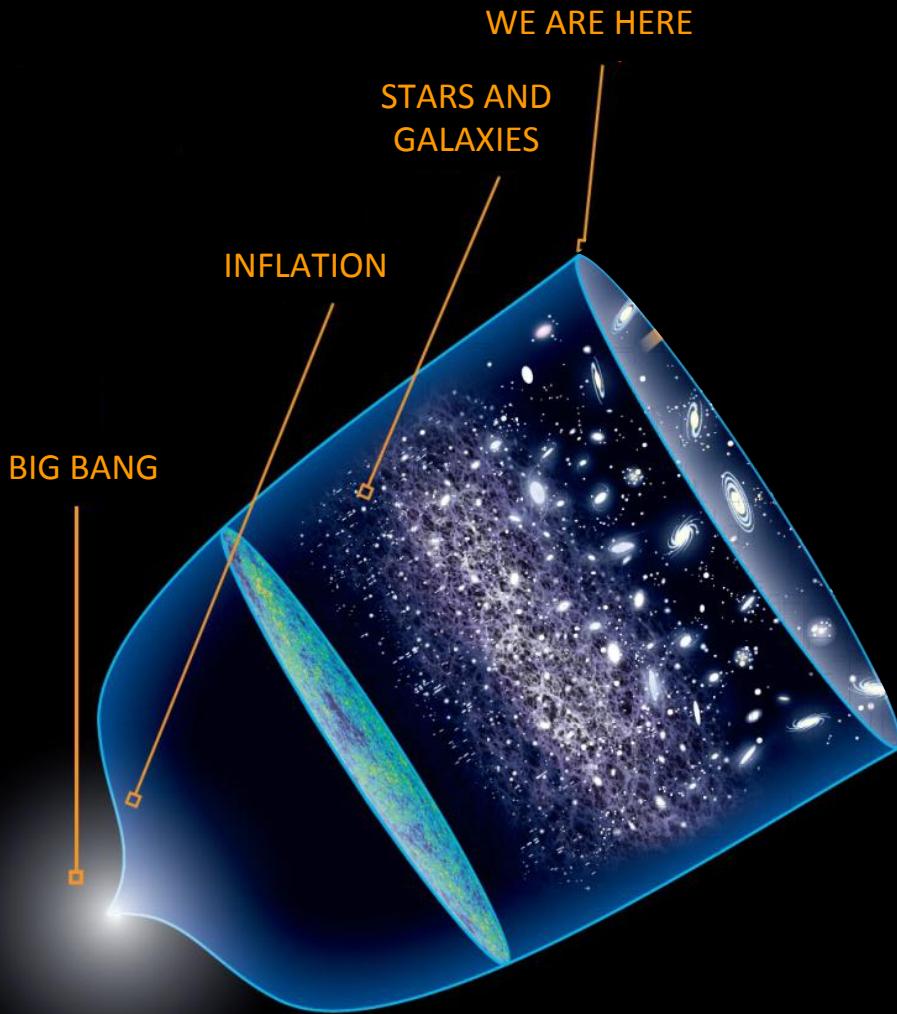

Tycho's 1572 Type Ia
Supernova

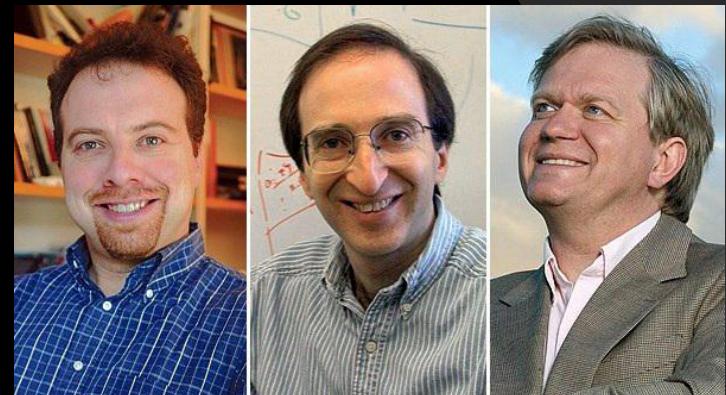

In 1998 we
discovered that the
expansion of the
Universe is
accelerating!

ACCELERATING
EXPANSION

Nobel 2011

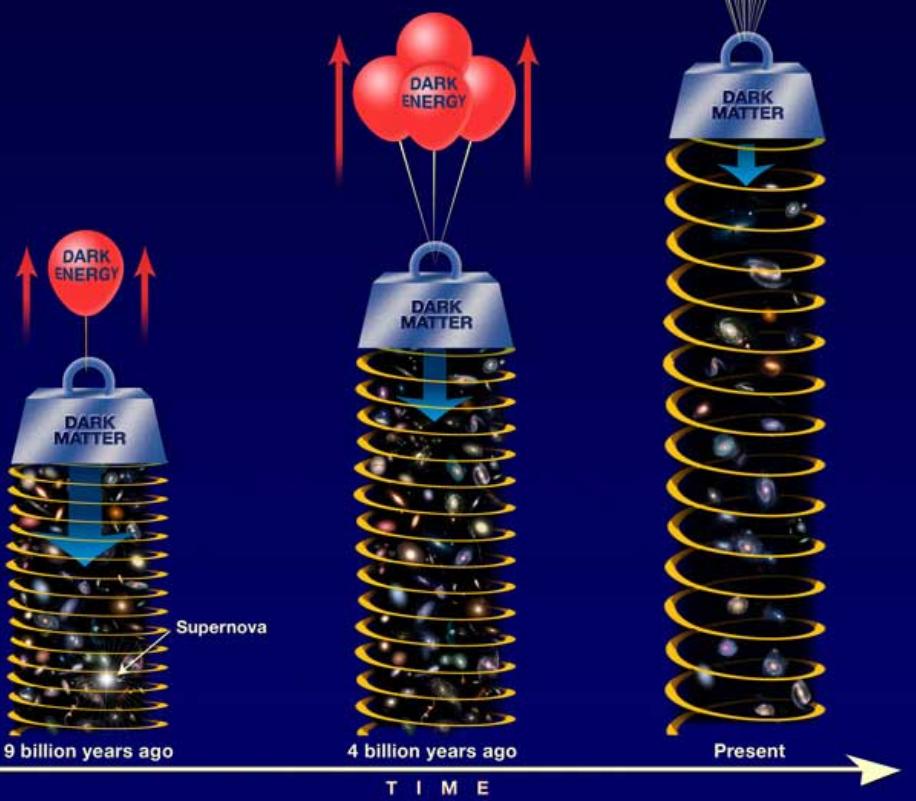

There must be an
energy opposing to
gravity:
Dark Energy

Adam
Riess

Saul
Perlmutter

Brian
Schmidt

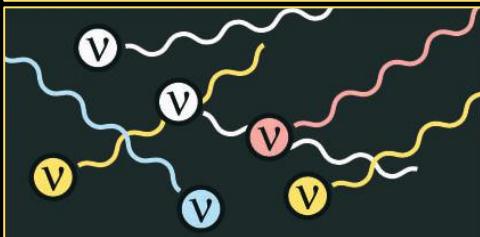

$$\frac{8\pi G}{c^4} T_{\mu\nu} = R_{\mu\nu} - \frac{1}{2}R g_{\mu\nu} + \Lambda g_{\mu\nu}$$

Einstein was right!

The Cosmological Constant Λ
must be reintroduced
to take into account the energy
opposing to Gravity and accelerating
the Universe expansion

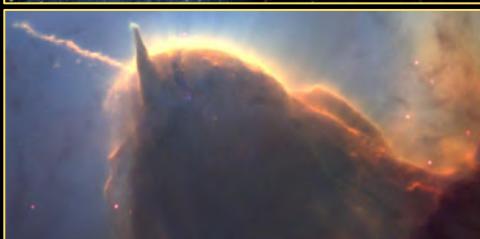

0,025% - Heavy Elements (C, N, O, Si, Ni, Fe...)

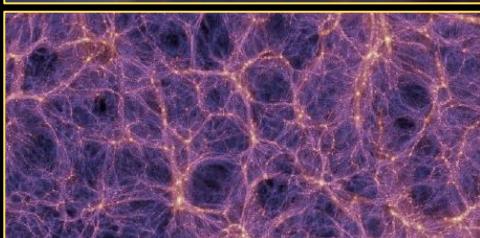

0,3% - Neutrinos

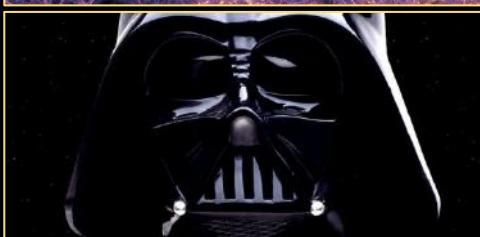

0,5% - Hydrogen/Helium in Stars

4,1% - Intergalactic Hydrogen/Helium

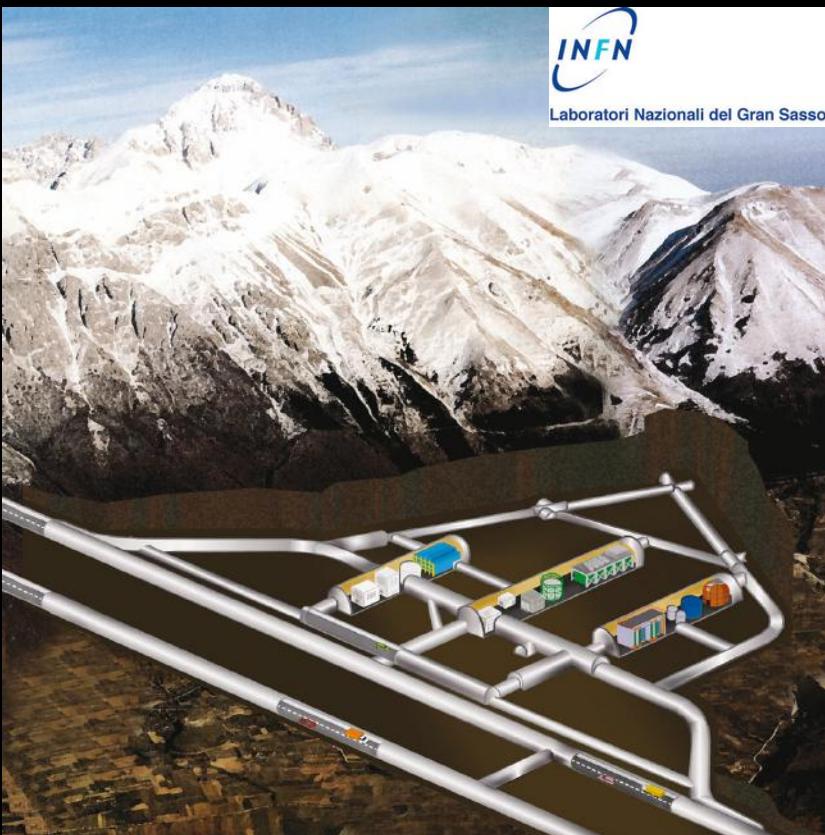

27% - Dark Matter

68% - Dark Energy
